OVERVIEW OF BUSINESS

Dachepalli Publishers Limited is an established content-based educational publishing house dedicated to serving the K-12 segment across CBSE, ICSE, and State Board curriculums. We provide high-quality textbooks along with partnering with various schools ranging from the capacity of 100 to 50,000 students as a comprehensive academic support system. Our integrated content and support services are designed to empower educators, streamline academic delivery, and enhance student learning outcomes across all grade levels.

Founded in 1998 by Mr. Vinod Kumar Dachepalli and Mr. Rushikesh Dachepally as a private limited entity, Dachepalli Publishers Limited traces its roots back to a modest bookstall established by their forefather in the early 1900s. Initially focused on retailing textbooks and magazines, the business gradually evolved to meet the growing educational needs of the region, expanding into publishing Urdu textbooks, diaries, and eventually comprehensive academic content. With over a century of legacy in the book trade, the Dachepalli name has become deeply trusted and widely recognized across the states we operate in. This longstanding presence gives us a significant edge in building credibility and fostering long-term relationships with schools, educators, and retailers alike.

As of 2025, our portfolio features over 600 titles distributed under six prominent brands: Dachepalli publishers Limited, Apple Book Company, Orange Leaf Publishers, Pelican Publishing House, Sangam Publishing House, and School Book Company. Alongside printed materials, we provide schools with curriculum-aligned digital resources at no additional cost. Upon purchasing our textbooks, schools gain access to a range of educational tools—including instructional videos, a test generator, and other academic software—installed directly within their premises. This approach not only helps schools become digitally empowered with tailored technology but also allows them to avoid the high costs of third-party software. Because our digital tools are designed exclusively to complement our textbooks, schools that enroll on our platform tend to maintain their partnership with us for 3 to 4 years, benefiting from a seamless and integrated academic ecosystem. *For detailed information on our business activities, please refer to Chapter titled “Our Business” beginning on page no 122 of this Prospectus.*

Growth of the publishing market in India is driven by emerging technologies and adaptations to consumers’ changing behavior and this benefits Indian Media and content ecosystem greatly. The market covers various forms of newspapers, journals, books, magazines and eBooks. Dramatic changes have been brought to publishing practices by digital technologies, making publishing material more accessible and providing a lively variety of materials to audiences. With proliferation of literacy, increased regional language content choices, and focus on mobile and digital platform, the India’s publishing market has witnessed major development. It is obvious that there is still some growth, yet the sector is not altogether without problems, especially the financial strain of print production, and the need to enhance its online platform. Publishing industry is growing, catering to demand for education, entertainment and information across a broad cross section of people.

The India Publishing Market size is expected to grow at a significant CAGR of 5.8% during the forecast period 2025-2031. The rapid growth in internet connectivity and smartphone usage has played a major role in the growth of digital publications for the India Publishing Market. Since its adoption and expansion of e-learning

sites, more readers were gained and the reach of the market was increased online. Increasing demand for books in their local languages has also helped in market development to reach the extensive community of regional audiences in India. Increased demand for published goods has been attributed to the government programs on literacy and education. New developments in digital practices and new ways of content production are hugely supporting the Indian publishing industry in developing a growth potential and modern outlook. All these factors contribute to India Publishing Market growth.

The Publishing Market in India faces several challenges, including the high cost of imported raw materials like paper, making traditional formats less sustainable. Piracy of digital content and unauthorized reproduction has significantly hindered monetization within the sector. Another challenge lies in the fragmented market, where publishers struggle to adapt to rapidly evolving digital consumption trends. Regulatory complexities surrounding intellectual property rights and data usage also pose barriers for publishers. Furthermore, inadequate digital literacy in rural areas impedes the full adoption of e-publishing, requiring broader infrastructure improvements. Despite these obstacles, India's publishing market growth remains strong, driven by innovation and sector resilience.

India Publishing Market Trends

The India Publishing Market is witnessing key trends, such as the surge in digital and mobile-first platforms tailored for convenience and instant access. Advanced technologies like data analytics, AI-driven content personalization, and interactive e-books enhance user engagement. Publishers are leveraging subscription models and offering bundled content services to drive revenue streams. Similarly, regional language content has emerged as a key growth pillar, addressing the vast diversity in linguistic preferences across India. Retail strategies include creating seamless access across physical and digital channels, such as using click-and-collect models or integrating AR/VR in print media for hybrid experiences, showcasing how the market is adapting to changing consumer dynamics.

Investment Opportunities in the India Publishing Market

The India Publishing Market holds attractive investment opportunities, majorly in expanding the digital ecosystem. E-commerce and e-publishing platforms represent significant growth potential due to rising digital education demands and online readership. Regional language publishing also provides untapped potential for investors aiming to penetrate rural and semi-urban regions. Furthermore, improving logistics, such as distribution networks for book delivery, offers opportunities for enhanced operational efficiency. Investments in educational content production and innovative media platforms, aligned with India's growing e-learning wave, are set to unlock further potentials. Enhanced adoption of smarter tools for marketing, content curation, and virtual reading spaces presents additional avenues.

Future Insights of the India Publishing Market

The India Publishing industry is poised for substantial growth in both traditional and digital segments. Increased innovation in digital storytelling and interactive publishing will redefine content consumption habits. Eco-friendly printing solutions and digital-first approaches will likely dominate future trends, aligning with global sustainability goals. Educational content will see exponential growth as digital and mobile platforms continue to penetrate underserved regions. However, the market must address content piracy, accessibility barriers, and regulatory compliance to maximize its potential. Publishers adopting cutting-edge technologies and creating scalable models will position themselves for success in this rapidly shifting industry landscape.

The manufacturing operations of our Company are carried in the state of Telangana at Plot no. 121/5, Phase-II, IDA Cherapally, Hyderabad, Medchal Malkajgiri, Telangana-500051. Due to the geographical concentration of our manufacturing operations in Telangana, our operations are susceptible to local, regional and environmental factors, such as social and civil unrest, regional conflicts, civil disturbances, economic and weather conditions, natural disasters, demographic and population changes, and other unforeseen events and circumstances. Such disruptions could result in the damage or destruction of a significant portion of our manufacturing abilities, significant delays in the transport of our products and raw materials, loss of key managerial personnel, and/or otherwise adversely affect our business, financial condition and results of operations. In this region heightens our exposure to adverse developments related to competition, as well as economic and demographic changes in this region, which may adversely affect our business prospects, financial conditions and results of operations. Further, as we enter into new markets and geographical areas, we are likely to compete with other players, who might have an established presence, and are more familiar with business practices and have stronger relationships with local customers, relevant government authorities, suppliers or are in a stronger financial position than us, all of which may give them a competitive advantage over us. Our inability to expand into other areas may adversely affect our business prospects, financial conditions and results of operations. While our management believes that the Company has requisite expertise and vision to grow and mark its presence in other markets going forward, investors should consider our business and prospects in light of the risks, losses and challenges that we face and should not rely on our results of operations for any prior periods as an indication of our future performance.

*% of revenue from operations.

We do not ultimately control the performance of our third-party distributors, representatives and dealers to perform as required or to our expectations. Also, certain of our distributors and dealers may market other products that compete with our products. If our competitors provide better commissions or incentives to such distributors, it may result in their favouring our competitors over us. Additionally, if we are unable to engage distributors on mutually agreeable terms to distribute and sell our print content, it may significantly disrupt the supply of our publications to our customers, which may lead to a decline in the reach of our content and adversely affect our business and financial conditions. Further, any inability by us to provide print content to distributors and dealers could result in delay or inability to sell material to schools, retailers and end customers, thereby increasing sales returns and inventory. Further, although we enter into agreements with such distributors, we cannot assure you that such distributors will be able to fulfil their obligations under such agreements entirely, in a manner acceptable to us, or at all. As a result, we may have to initiate legal action in respect of any such breach and such legal action could divert the attention of our management from our operations, which could harm our business, financial condition and results of operation.

The loss of one or more of our distributors, representatives or dealers or their failure to effectively promote our products or otherwise perform in their functions in the expected manner could adversely affect our ability to bring our products to market and impact our revenues. Furthermore, our business growth depends on our ability to attract additional high-quality distributors to our distribution network. If we do not succeed in maintaining the stability of our distribution network and attracting additional high-quality distributors to our distribution network, our market share may decline, which would materially adversely affect our business, results of operations and financial condition.

The competitive advantage that we derive from our intellectual property may also be diminished or eliminated. We may need to litigate to enforce our intellectual property rights or to determine the validity and scope of the proprietary rights of others; any such litigation could be time-consuming and costly and a favourable outcome cannot be guaranteed. Moreover, we may not be able to detect any unauthorized use or be able to take appropriate and timely steps to enforce or protect our intellectual property.

In the event we face prolonged disruptions at our facilities including due to interruptions in the supply of electricity or as a result of labour unrest, or are unable to procure sufficient raw materials, we would not be able to achieve full capacity utilization of our current manufacturing facility, resulting in operational inefficiencies which could have a material adverse effect on our business and financial condition.

For further information, see “Our Business” on page 122 of this Prospectus.

These rates are not indicative of future capacity utilization rates, which is dependent on various factors, including demand for our products, availability of raw materials, our ability to manage our inventory and improve operational efficiency. Under-utilization of our manufacturing capacities over extended periods, or significant under-utilization in the short term, could materially and adversely impact our business, growth prospects and future financial performance.

- 10. There are certain discrepancies/errors noticed in some of our corporate records relating to forms filed with the Registrar of Companies and other provisions of Companies Act, 2013 during the last five years. Any penalty or action taken by any regulatory authorities in future for non-compliance with provisions of corporate and other law could impact the financial position of the Company to that extent.**

In the past years since 1st April, 2008, there have been some instances of delays/ non-compliance with certain statutory authorities with certain provision of statutory regulations applicable to us such as:

Also, some of documents filed with registrar of companies was not properly signed and no proper letterhead was used by the Company in terms of provisions of Companies Act, 2013/ 1956.

Although the late filing fees levied are small but if we continue this practice, the accumulated amounts of each delay may adversely affect our cash flows. Although no- show cause notice has been issued against our Company till date, in respect of above, in the event of any cognizance being taken by the concerned authorities in respect of above, actions may be taken against our Company and its directors, in which event the financials of our Company and our directors may be affected. Further we cannot assure that we may not do delay filings in future and not be subjected to penalty or interest. Further with the expansion of our operations there can be no assurance that deficiencies in our internal controls and compliances will not arise, or that we will be able to implement, and continue to maintain, adequate measures to rectify or mitigate any such deficiencies in our internal controls, in a timely manner or at all. While no legal proceedings or regulatory action has been initiated against our Company in relation to above mentioned non-compliance or instances of non-filings or incorrect filings or delays in filing statutory forms with the RoC as of the date of this Prospectus, we cannot assure you that such legal proceedings or regulatory actions will not be initiated against our Company in future and we cannot assure you that we will not be subject to penalties imposed by concerned regulatory authorities in this respect. Therefore, if the authorities impose monetary penalties on us or take certain punitive actions against our Company in relation to the same, our business, financial condition and results of operations could be adversely affected.

-
- 11. Our continued operations are critical to our business and are subject to operating risks such as breakdown or failure of machinery, disruption to power sources or any temporary shutdown of our manufacturing facilities, in the event of which, our business, results of operations, financial condition and cash flows can be adversely affected.**

Our manufacturing facility is subject to operating risks, such as the breakdown or failure of machinery, power supply or processes, performance below expected levels of efficiency, obsolescence of equipment or machinery, labour disputes, natural disasters, industrial accidents and the need to comply with the directives of relevant government authorities. Our customers rely significantly on the timely delivery of our products and our ability to provide an uninterrupted and timely supply of our products is critical to our business. We also require substantial electricity for our manufacturing facilities which is sourced from state electricity boards. Our customer relationships, business and financial results may be materially adversely affected by any disruption of manufacturing operations, including as a result of any of the factors mentioned above.

- 12. Our business is intricately tied to the academic cycle, making it somewhat cyclical in nature. As a result, our revenue and profitability may not be comparable from one period to another.**

The sale of our books under the K-12 business are linked to the academic cycle, and is, therefore, seasonal in nature. In the K-12 segment, majority of the sale starts with the beginning of the new academic year i.e. first and fourth quarter. In addition, the working capital cycle for publishing and printing tends to be unduly high at the fiscal year end on account of high sales in the specific quarter, which comes down significantly in the subsequent periods. Our sales seasonality in our K-12 segment materially affects our operating revenue, margins and cash flows from period to period. Accordingly, our operating revenues and margins may be higher during one quarter of the year as compared to another quarter. As a result, our period-on-period data regarding our operating revenue, margins and cash flows may not be comparable for any future fiscal periods.

- 13. Our product is subject to changing examination paper pattern and syllabus, and customer preferences, our inability to meet such needs or preferences may affect our business.**

The success of our products depends on the content which we provide and the its ability to meet the end user's requirement based on changing examination paper pattern and syllabus, and evolving customer preferences. The acceptability of these products depends on the capacity of these books to stay ahead of changing customer requirements and remain attuned to emerging preferences. A failure to do so could result in a difference between our contents and the current demands of the market, potentially impacting our revenue from operations, customer satisfaction, and overall business performance. It is imperative for our Company to maintain a robust feedback loop with customers, closely monitor industry trends and invest in research and development to anticipate and respond to evolving demand in the education sector. This serves as a strategic approach not only for meeting current demands but also for staying ahead of competitors and fostering long-term customer loyalty in the domain. In case we fail to respond to the frequently changing syllabus, education patterns and customer preferences, this may have an adverse impact on our business operation, revenue from operations and profitability.

- 14. The contents of the books we publish and the authors who drafts these content are very significant for our business. The loss of all or any of our authors could adversely affect our business, results of operation, cash flows and financial condition.**

We operate in an environment where there is intense competition for successful authors. The success of our business largely depends on the quality of the content we prepare and publish which directly depends on the authors and editors who are involved in the preparation and finalization of the contents. We have over the years, developed a team of authors and editors who are involved in the preparation and updation of the content published in the books. In case, we lose any of our authors or editors due to any reason beyond our control like better opportunities provided by the competitors, independent working by the authors etc. we may be required to make alternative arrangement for the content development and upgradation. In case we are not able to make suitable arrangement for the same we may have an adverse effect on our business operation, future revenue and profitability. Further, the heavy dependence on these authors and editors increases the risk that the loss of, or problems with, any author could have significant effect on our sales and profitability.

15. We are required to obtain, renew or maintain certain statutory and regulatory permits and approvals required to operate our business and if we fail to do so in a timely manner or at all, our business, financial conditions, results of operations, and cash flows may be adversely affected.

We require certain statutory and regulatory licenses, registrations and approvals to operate our business. Many of these approvals are granted for specific duration and need renewal from time to time. Non-renewal of the said permits and licenses would adversely affect our operations, thereby having a material adverse effect on our business, results of operations and financial condition. There can be no assurance that the relevant authorities will renew such licenses, registrations and approvals in a timely manner or at all. We need to initiate the process of changing our Company name in all our registrations and statutory approvals, updating them to reflect our new status. Any delay or failure to do so could have an adverse effect on our business and results of operations.

In particular, our Company has applied for NOC from the Fire Department for the Factory and registered office. Further, these licenses, registrations and approvals are subject to several conditions, and we cannot assure that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to statutory authorities, and this may lead to cancellation, revocation or suspension of relevant licenses, approvals and registrations. Failure by us to renew, maintain or obtain the required licenses or approvals, or cancellation, suspension, or revocation of any of the licenses, approvals and registrations may result in the interruption of our operations and may have a material adverse effect on our business, results of operations and financial condition. For further details of the approvals yet to be obtained by us, and please see the chapter titled "Government and Other Approvals" beginning on page 219 of this Prospectus.

16. Any rise in costs or a deficiency in the availability of the raw materials we procure could impact on our company's sales, profitability, and operational results in an adverse manner.

Our Company is dependent on third party suppliers for procuring the raw materials and other designing and decorative bought out material which we use to print and publish the books which we sell to our customers. We are exposed to fluctuations in the prices of these materials as well as its unavailability, particularly as we typically do not enter into any long-term supply agreements with all our suppliers and our major requirement is met in the spot market. The cost and availability of such materials are subject to a variety of factors and any increase in their cost and their availability at a reasonable price or at all, could adversely affect our margins, sales and results of operations. There can be no assurance that strong demand, capacity limitations or other problems experienced by our suppliers will not result in occasional shortages or delays in their supply of materials. If we were to experience a significant or prolonged shortage of such materials from any of our suppliers, and we cannot procure the products from other sources, we would be unable to meet our execution schedules and to deliver our products to our customers in timely fashion, which would adversely affect our sales, margins and customer relations. We cannot assure you that a particular supplier will continue to supply the required materials to us in the future. Any change in the supplying pattern of our products can adversely affect our business and profits.

17. Inventories and trade receivables constitute a major part of our current assets. Inadequate management of these assets could negatively impact our net sales, profitability, cash flow and liquidity.

Our Company's business is working capital intensive and hence, inventories and trade receivables form a major part of our current assets. Our Company has in house printing and binding activities. Under this business model, a certain portion of our assets comprises of an inventory of raw materials and finished products. Maintaining sufficient inventory is critical for our operations which could act as a buffer against any supply disruptions. Any failure on our part to effectively manage our inventory in response to changing market scenario may have an adverse effect on our financial condition and may even lead to loss of business and increase the costs of our operations. During the year ended March 31, 2025, March 31, 2024, March 31, 2023 and six months ended 30th September, 2025, our inventories were Rs. 3,043.60 lakhs, Rs. 2,723.16 Lakhs, Rs. 2,744.61 Lakhs and Rs. 3500.00 lakhs respectively.

To effectively manage our trade receivables, we must be able to accurately evaluate the credit worthiness of our customers and ensure that suitable terms and conditions are given to them in order to ensure our continued relationship with them. However, if we fail to accurately evaluate the credit worthiness of our customers, it may lead to bad debts, delays in recoveries and / or write-offs which could lead to a liquidity crunch, thereby adversely affecting our business and results of operations.

During six months ended 30th September, 2025 and Financial Years ended March 31, 2025, 2024 and 2023, our trade receivables were Rs. 5,639.12 lakhs, Rs. 6191.56 lakhs, Rs. 5605.01 Lakhs and Rs. 4478.21 lakhs respectively. Further, following are the trade receivable days for the year ended March 31, 2025, March 31, 2024, March 31, 2023 and six months ended 30th September, 2025.

<i>Particulars</i>	<i>30th September, 2025*</i>	<i>March 31, 2025</i>	<i>March 31, 2024</i>	<i>March 31, 2023</i>
<i>Trade Receivables (Days)</i>	535	337	362	402

**not Annualised*

We may be subject to working capital risks due to delays or defaults in payment by clients, which may restrict our ability to procure raw materials and make payments when due. In addition, any delay or failure on the part of the clients to make payment of the amount dues may lead to legal consequences with our customers. Such defaults/delays by our customers in meeting their payment obligations to us may have a material effect on our business, financial condition and results of operations. A liquidity crunch may also result in case of increased working capital borrowings and, consequently, higher finance cost which will adversely impact our profitability.

18. Unexpectedly large amount of sales returns could adversely affect our financial results. If we are unable to accurately forecast customer demand, we may not be able to maintain adequate inventory levels.

We typically permit our distributors to return products that they purchase from us if the products are not sold within a prescribed time period or if the product does not conform to specifications such as printing error or any other damage at the same cost for which the products were purchased from us. If we receive a greater number of returns than expected, based on historical averages, our business and operations could be adversely affected and we may incur significant expenses associated with such returns. Further, printing of our content and other products is decided based on management estimates of demand using historical sales data which is used to judge the future sales pattern and we start printing before the preparation of an order book. If we fail to accurately forecast customer demand, we may experience excessive inventory levels or a shortage of products available for sale. There can be no assurance that we will be able to successfully manage our inventory at a level appropriate for future customer demand.

19. Illegal copying of our books and piracy of our digital content, can affect our sales and future growth.

The success of our business largely depends on the quality of the content i.e. published or digital which we prepare and publish. The sale of our books and the acceptability of our books and digital content to a large extent depends on the quality of the contents we offer. In case of any illegal copying of our books or any piracy of the digital contents, which we are not able to detect may have an adverse effect on our business operation, future revenue and profitability. Further, even if we are able to detect such illegal copying or piracy, we may not be able to defend the same in our favour and may subject us to legal proceeding and have an adverse effect on our business operations and financial position.

20. Schools may institute curriculum management programs offered by our competitors, which would prevent us from selling our content to such schools which may adversely affect our sales and profitability.

A number of our competitors have developed curriculum management programs, which define all subjects, content and material tested at different levels. Companies that offer curriculum management services provide all content and can ensure that their products are fully subscribed to by schools and teachers, thereby excluding competitors' products. While we intend to offer curriculum management services as part of our strategy, if our competitors are more successful, we are at risk of having our content, products and services prevented from being sold to schools that have signed up for curriculum management services. If we are unable to compete successfully against existing or new competitors offering curriculum management services, our business, results of operations and financial condition may be materially adversely affected.

21. Increased customer expectations for lower prices or free bundled products could reduce sales revenues.

Customer expectations for lower priced products have increased due to customer awareness of reductions in production costs and the availability of free or low-cost digital content and products. Customers have become accustomed to being given technology-enabled products at no additional charge from content providers, including us, as incentives to adopt programs and other products. As a result, there has been pressure to price our products competitively and increase the amount of products and materials sold as part of hybrid and bundled print and digital learning products. Some of our existing contracts with our authors need to be amended to cover the production of digitized content; however, if we are unsuccessful or unable to amend such contracts in a timely matter such that the contracts with our authors do not cover the production of digitized content, we may be unable to provide such content in a digitized and low-cost form. Increased customer demand for lower prices or free bundled products could reduce our sales revenue and/or increase our production costs and could have a material adverse effect on our business, results of operations and financial condition.

22. We have entered into and may continue to enter into related party transactions and there can be no assurance that such transactions have been on favourable terms.

We have entered into certain transactions with related parties may continue to do so in future. While our Company believes that all such transactions have been conducted on arms-length basis and is in compliance with the Companies Act and other applicable laws, there can be no assurance that it could not have been achieved on more favourable terms had such transactions not been entered into with related parties. Furthermore, it is likely that our company will enter into related party transactions also in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operation.

For details, please refer to “Annexure - Related Party Transactions” of restated financials under section titled “Financial Statement as Restated” on page 194 of the Prospectus.

23. Our company has encountered challenges in meeting the designated timelines for filing statutory returns, which may subject us to penalty under the relevant laws.

There have been delays in filing GST, EPF and ESIC returns by our Company. Following are details of delays:

29. The success of our business is dependent on our warehouse and logistics capabilities, and disruptions in operations and supply chain could reduce or restrict sales and materially adversely affect our business, results of operation, cash flows and financial condition.

Our logistics network, which as on date of this Prospectus, comprised of warehouse located at multilevel floors of building situated at Plot no. 2/B, (C.F. AREA) I.D.A., Cherlapalli, Phase II, Hyderabad, Telangana- 500051, space used

for logistics with overall built-up area of about 30,000 sq ft to allow coverage across India. Further, we use our owned vehicles and also use the services of various local carriers to transport our inventory between our warehouse and our distributors and dealers. Transportation delays, disruptions and accidents can disrupt our operations from time to time.

Our Company do not enter any formal agreement with third party transportation agency for our logistics service, if our warehouse or logistics operations are substantially disrupted, we may not be able to replace the equipment or inventories, or use a different facility to continue our operations in a timely and cost-effective manner or at all. In addition, while our facilities have been insured, we may not be able to recover from damage or interruptions caused in a timely manner, or at all. The occurrence of any such event could result in the temporary or long-term closure of our warehouse. The occurrence of any of the above could materially adversely affect our business, results of operation, cash flows and financial condition.

30. Fraud, theft, employee negligence or similar incidents may adversely affect our results of operations and financial condition.

As on September 30, 2025, we had total inventory consisting of goods to the value of Rs. 3500.00 lakhs. Our business operations require us to maintain large amounts of inventory. Our operations may be subject to incidents of theft or damage to inventory, prior to or during stocking and display. Although we have set up various security measures and follow stringent operational processes such as stock taking, there can be no assurance that we will not experience any fraud, theft, employee negligence, security lapse, loss in transit or similar incidents in the future, which could adversely affect our results of operations and financial condition. Additionally, in case of losses due to theft, fire, breakage or damage caused by other casualties, there can be no assurance that we will be able to recover from our insurer the full amount of any such loss in a timely manner, or at all. If we incur a significant inventory loss due to third-party or employee theft and if such loss exceeds the limits of, or is subject to an exclusion from, coverage under our insurance policies, it could have a material adverse effect on our business, results of operations and financial condition.

31. Our inability to expand or effectively manage our distribution network may have an adverse effect on our business, results of operations and financial condition.

Over the years, our company generates the sales from schools and other customers through its own sales team and the orders are generally given through the dealers dealing with the relevant school. Our ability to expand and grow our product reach significantly depends on the reach and effective management of our dealership network. We continuously seek to increase the penetration of our products by appointing new dealers targeted at different customer groups and geographies. We cannot assure you that we will be able to successfully identify or appoint new dealers or effectively manage our existing network. We may be unable to appoint replacement in a timely manner, or at all, which may reduce our sales volumes and adversely affect our business, results of operations and financial condition. We typically do not have any exclusive agreements with many of our dealers and while we offer them certain incentive schemes to distribute our products, we may not be able to effectively implement them across our distribution network.

Also, our competitors may adopt innovative distribution models, which could be more effective than the distribution models adopted by us resulting in a reduction in the sales of our products. We may also face disruptions in the delivery of our products for various reasons beyond our control, including poor handling of our products, transportation bottlenecks, natural disasters and labour issues, which could lead to delayed or lost deliveries. In addition, failure to provide distributors with sufficient inventories of our products may result in a reduction in the sales of our products. If our distributors fail to distribute our products in a timely manner, or loss of any of our dealers may adversely affect our business and results of operations.

32. We operate in a highly-competitive and disintegrated industry, and our business, results of operations and financial condition may be adversely affected if we are not able to compete effectively.

The Indian market for education content is highly competitive and fragmented. The Indian education market consist of multiple boards, including the state education boards, the Central Board of Secondary Education ("CBSE"), and the Indian Certificate of Secondary Education ("ICSE"). Further, there are only a few large, established industry participants similar to us, as the market is characterized between smaller regional, state and local content providers and also includes subject specific content providers for particular subjects or course material. Also, many of the content providers have strong brand recognition in the markets and long-

term relationships with schools, school authorities and educational authorities. Further, we also face competition from the National Council of Educational Research and Training (“NCERT”) and the State Council of Educational Research and Training (“SCERT”), which publish books for the K-12 market at subsidized costs. Additionally, intense competition may require us to price our products competitively and provide purchasing incentives to our dealers, distributors and customers. Failure to do so may result in the reduction of our sales in the market. Our future success depends on our ability to compete effectively, including distinguishing our products, content or services from our competitors, by expanding our brands and titles, by providing higher quality content, expanding our distribution, sales and marketing forces, etc. We cannot assure you that we will be able to sufficiently and promptly respond to changes in customer preferences and other competitive practices in the future, nor can we assure you that we will be able to maintain or increase our existing market share.

33. Any unsecured loans drawn by us may be recalled by the lenders at any time, which may adversely affect our business, financial condition, results of operation and prospects.

Our Company has availed unsecured loans which may be recalled by lenders at any time with or without the existence of an event of default, on short or no notice. As of September 30, 2025, such loans amounted to Rs. 2644.03 Lakhs. In the event that any lender seeks a repayment of any such loan, our Company would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all. As a result, any such demand may materially affect our business, cash flows, financial condition and results of operations. For further details, please see the section entitled “Financial Indebtedness” on page 212 of this Prospectus.

34. We are subject to the restrictive covenants of banks in respect of the Loans/ Credit Limits and other banking facilities availed from them.

Our financing arrangements contain restrictive covenants whereby we are required to obtain approval from our lender, regarding, among other things such as major changes in share capital, management, changes in fixed assets, creation of any other charge, undertake any guarantee obligation etc. There can be no assurance that such consents will be granted or that we will be able to comply with the financial covenants under our financing arrangements. In the event we breach any financial or other covenants contained in any of our financing arrangements, we may be required under the terms of such financing arrangements to immediately repay our borrowings either in whole or in part, together with any related costs. This may adversely impact our results of operations and cash flows.

For further details on the banking facilities, please see “Financial Indebtedness” on page 212 of the Prospectus.

35. Our lenders have charge over our movable properties/vehicles in respect of finance availed by us.

We have secured our lenders by creating a charge over our movable properties / Vehicles in respect of loans / facilities availed by us from banks and financial institutions. The total amounts outstanding and payable by us as secured loans were Rs. 1,682.38 lakhs as on September 30, 2025 as per our Restated Financial Statements. In the event we default in repayment of the loans / facilities availed by us and any interest thereof, our properties may be forfeited by lenders, which in turn could have significant adverse effect on business, financial condition or results of operations.

For further information on the “Financial Indebtedness” please refer to page 212 of this Prospectus.

36. Changes in technology may render our current technologies obsolete or require us to make substantial capital investments.

Modernization and technology up gradation is essential to reduce costs and increase the efficiency. Our technology may become obsolete or may not be upgraded timely, hampering our operations and financial conditions and we may lose our competitive edge. Although we believe that we are utilizing latest technology by using latest software and Equipment, we shall continue to strive to keep our technology updated. In case of a new found technology in the service Industry, we may be required to implement new technology employed by us. Further, the cost in upgrading our technology is significant which could substantially affect our finances and operations.

37. Our business and results of operations may be adversely affected by factors such as general economic conditions, changes in the educational policies of the government and changes to the syllabus and curriculum standard and Stock damages.

The performance and growth of our businesses which could be adversely affected by general economic conditions and other factors outside of our control. In response to general economic conditions, private schools and school organisations may reduce educational spending to protect against existing or expected economic conditions or seek cost savings for the end customers being students. Similarly, changes in the procurement process for print content, binding and content editing could also affect our markets and sales.

Further, our business, results of operations and financial condition may be materially adversely affected by changes in educational syllabus and curriculum of schools coupled with any delays in our ability to adapt to the changes in the syllabus and curriculum and educational processes in a timely manner. These changes may adversely affect our inventory of books as we may be left with print content which is no longer viable. In the event there are significant changes in the curriculum and we are unable to update our educational materials to such changes in a timely and cost-efficient manner, or if it is required to discontinue certain titles, our business, results of operations and financial condition could be materially adversely affected. Further, the Company may face challenges of damaged stock, which can occur during the transit. Materials may get damaged while being transported or while in storage.

38. We operate in markets which are dependent on IT systems and technological change. If we are unable to keep our systems and technologies updated, it will adversely affect our business conditions.

We use IT systems and products to support our business activities. As our operations grow in size and scope, we must continuously upgrade our systems and infrastructure, while maintaining the reliability and integrity of our systems and infrastructure in a cost-effective manner. We face several technological risks associated with software product development and service delivery in our educational businesses, information technology security (including virus and hacker attacks), e-commerce, enterprise resource planning, system implementations and upgrades. Any failures of our systems whether as a result of operational failures, tampering or hacking, human error, natural disasters, computer viruses or other factors could disrupt our operations, interrupt their availability or result in loss of data. The occurrence of such problems or other operational disruptions could result in liability or harm to our reputation which in turn could adversely affect our business, results of operations and financial condition.

39. Our business may be impacted by technological change, including the digital evolution and other disruptive technologies, and the presence and development of open-sourced content could continue to increase, which could adversely affect our revenue.

Post the impact of covid -19 pandemic, digital migration has brought changes in the content distribution, consumers' perception of value and the content provider's position. Though we have taken substantial steps to expand our business operations, but if we are unable to adapt or move towards our expansion at the rate of our competitors, our ability to effectively compete in the marketplace will be adversely affected. Further, technology has generally resulted in short lead times for producing products that meet customer specifications. Shorter time to market our products increases the risk that our products may contain flaws or corrupted data, and these defects may only become apparent after product launch, particularly for new products and new features to existing products that are developed and brought to market under tight time constraints which could result in liability, loss of revenue or harm to our reputation. Further, with the increase in digitalization free or relatively inexpensive educational products are becoming increasingly accessible, through the internet and some governmental and regulatory agencies have increased the amount of information they make publicly available for free. To the extent that such open-sourced content is developed and made available to educational content customers in India and is competitive with our materials, our sales opportunities and net sales could be adversely affected. Technological changes and the availability of free or relatively inexpensive information and materials may also affect changes in consumer behaviour and expectations. These free or relatively inexpensive information and lower pricing of digital educational products may reduce demand and impact the prices we can charge for our products and services. To the extent that technological changes and the availability of free or relatively inexpensive information and materials limit the prices we can charge or demand for our products and services, our business, financial position and results of operations may be materially adversely affected.

40. Our business depends on our reputation and customer perception of our brand, and any negative publicity or other harm to our brand may materially adversely affect our business, results of operations and financial condition.

We also believe our reputation has helped us attract and retain customers who use our products throughout the education cycle. As a result, our reputation and customer perception of our brands are critical to the success of our business. However, our ability to maintain our brand recognition depends on a number of factors, some of which are beyond our control. Maintaining and enhancing our reputation and brand recognition depends primarily on the quality and consistency of our print content and educational offerings, as well as the success of marketing and promotional efforts by us and our distributors. Maintaining and enhancing our brands is essential to our efforts to maintain and expand our customer base. If customers do not perceive our products to be of high quality or differentiated owing to its content, our brand image may be harmed, thereby decreasing the attractiveness of our print content and educational offerings.

Further, it is possible that our marketing and promotional initiatives may be insufficient or unsuccessful in increasing awareness of our brand. Any failure to allocate appropriate resources to brand investment, to refine our existing marketing approach or to introduce new marketing approaches and marketing channels in an effective manner could reduce our market share, cause our revenue to decline and negatively impact our profitability. Additionally, if our competitors increase their spending on marketing and promotions, our marketing or promotions could become less effective than those of our competitors, and we could experience a material adverse effect on our business, financial condition and results of operations.

41. We may not be able to effectively implement our business and growth strategies and achieve future growth.

We operate in a dynamic industry, and on account of changes in market conditions, industry parameters, or technological improvements, our management is required to continually assess our strategies to position us for future growth. Our business strategy is to expand our presence in the Maharashtra, CBSE Boards in different States and other boards and strengthening technology enabled system including digital media. Our growth strategies and plans may undergo changes or modifications from time to time, and such changes or modifications may be substantial, and may even include limiting or foregoing growth opportunities if the situation so demands. We may not be able to efficiently or effectively implement our growth strategies or manage the growth of our operations and any failure to do so may limit future growth and have an adverse effect on our business. Further, revenues may not grow as quickly as we currently expect, and we may be incorrect in our assumptions and expectations of consumer requirements and changing technologies. Also, the fund requirement and deployment for our strategies are based purely on management estimates and assumptions considering the current market scenario and are subject to revision in the light of changes in external circumstances or costs. If we are unsuccessful in executing our strategic plan, or if the underlying estimates or assumptions used to develop our strategic plan are materially inaccurate, our business and financial condition would have an adverse impact.

42. Negative publicity could adversely affect our revenue model and profitability of our Company.

Our business is dependent on the trust our customers have reposed in the quality of our services. Any negative publicity our Company due to any other unforeseen events could affect our reputation and our results from operations. Further, our business may also be affected if there is any negative publicity associated with the services which are being rendered by our Company which may indirectly result in erosion of our reputation and goodwill.

43. Our success depends largely on the continued efforts of our senior management and our ability to attract and retain skilled personnel.

Our future success depends on the continued services and performance of the members of our management team and other key employees. We may not be able to retain our existing senior management or attract and retain new senior management in the future. Our competitors, with greater financial capabilities, may offer such personnel higher salaries and greater benefits than we are able to offer, which may impact our ability to attract and retain personnel. The loss of the services of key persons in the organization could seriously impair our ability to continue to manage and expand our business. Further, the loss of any other member of

our senior management or other key personnel may adversely affect our business, results of operations, financial condition and cash flows.

Further, we incur significant costs to retain our personnel and such costs have increased in recent years in view of the general growth in our business and industry and we may need to continue to increase the levels of compensation to our personnel to remain competitive and manage attrition. Such increase in compensation may have an adverse effect on our business, results of operations and financial condition.

44. Our ability to pay dividends in the future will depend on our earnings, financial condition, working capital requirements, capital expenditures and restrictive covenants of our financing arrangements.

Our ability to pay dividends in the future will depend on our earnings, financial condition, future cash flows, working capital requirements, capital expenditure and restrictive covenants of our financing arrangements. The declaration and payment of dividends will be recommended by the Board of Directors and approved by the Shareholders, at their discretion, subject to the provisions of the Articles of Association and applicable law, including the Companies Act, 2013.

We may retain all future earnings, if any, for use in the operations and expansion of the business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board and will depend on factors that our Board deems relevant, including among others, our future earnings, financial condition, cash requirements, business prospects and any other financing arrangements. We cannot assure you that we will be able to pay dividends in the future. For details of our Dividend history refer to the Section “Dividend Policy” on page 193 of the Prospectus.

45. Our promoter and promoter group will continue to retain significant control over our Company after the IPO.

After completion of the Issue, our Promoters and Promoter Group will collectively own 64.78% of the Equity Shares. As a result, our Promoters together with the members of the Promoter Group will be able to exercise a significant degree of influence over us and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act and our Articles of Association. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company.

In addition, our Promoters will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or minority shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

46. Our insurance coverage is limited and may not adequately protect us against all material hazards.

While we are covered against certain risks, but our insurance coverage is limited. Our significant insurance policies consist of coverage for risks related to burglary insurance policy, standard fire and special perils policy, marine sales turnover policy and vehicle insurance policy. We have insurance policies covering our vehicles, fire and special perils insurance for some of our facilities and premises, including the equipment contained therein.

While we believe the policies that we maintain would be adequate to cover all normal risks associated with the operation of our business, there can be no assurance that any claim under the insurance policies maintained by us will be honoured fully, in part or on time, or that we have obtained sufficient insurance (either in amount or in terms of risks covered) to cover all material losses. To the extent that we suffer loss or damage for events for which we are not insured or for which our insurance is inadequate, the loss would have to be borne by us, and, as a result, our business, results of operations and financial condition could be adversely affected.

47. Certain documents in relation to educational qualifications and experience for certain of our Directors and Key Management Personnel are not available and reliance has been made on

declarations and affidavits furnished by such Directors and Key Management Personnel for details of their profiles included in this Prospectus.

49. Any Penalty or demand raised by statutory authorities in future will affect our financial position of the Company.

Our Company is engaged in publication and sales of educational books which are exempt from GST and subject to Income Tax, and Professional Tax as per the applicable provisions of Law. We are also subject to the labour laws like depositing of contribution with Provident Fund and ESI. Though, we have deposited the required returns under various applicable Acts but any demand or penalty raised by the concerned authority in future for any previous year and current year will affect the financial position of the Company.

50. The average cost of acquisition of Equity Shares held by our Promoter is lower than the Issue Price

Our Promoter's average cost of acquisition of Equity Shares in our Company is very negligible, lower than the Issue Price which is proposed to be determined on a fixed price basis. The proposed fund requirement for our working capital requirement, as detailed in the section titled "Objects of the Issue" is to be funded from the proceeds of this IPO. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We therefore, cannot assure that we would be able to execute our future plans/strategy within the given timeframe. For details, please refer to the Chapter titled "Objects of the Issue" beginning on page 88 of this Prospectus.

53. Certain key performance indicators for certain listed industry peers included in this Prospectus have been sourced from public sources and there is no assurance that such financial and other industry information is complete.

Pursuant to the requirements of the SEBI ICDR Regulations, we have included certain key performance indicators, comprising financial and operational information, for certain listed industry peers, in the "Basis for Issue Price" beginning on page 98 of the Prospectus. Although this information is sourced from and relied upon on the audited financial statements of the relevant listed industry peers as available on the websites of the Stock Exchanges, including the annual reports of the respective companies submitted to Stock Exchanges, there is no assurance that this information with respect to industry peers is either complete. There may be different methodologies and formulas used to compute the various ratios.

54. Our operations are subject to high working capital requirements. Our inability to maintain an optimal level of working capital required for our business may impact our operations adversely.

Our business requires significant amount of working capital and major portion of our working capital is utilized towards operating expenses, inventories, trade receivables and cash and cash equivalents. As on 30th September, 2025, our term loan stood at Rs. 1,596.04 lakhs from HDFC Bank Limited and Protium Financial Limited. Our growing scale and expansion, if any, may result in increase in the quantum of current assets. Our inability to maintain sufficient cash flow, credit facility and other sources of funding, in a timely manner, or at all, to meet the requirement of working capital or pay out debts, could adversely affect our financial condition and result of our operations. Further, we have high outstanding amount due from our debtors which may result in a high risk in case of non-payment by these debtors. In case of any such defaults from our debtors, may affect our business operations and financials. For further details regarding working capital requirement, please refer to the section "Objects of the Issue" on page 88 of this Prospectus.

55. The Objects of the Issue for which funds are being raised have not been appraised by any bank or financial institution. Any variation between the estimation and actual expenditure as estimated by the management could result in execution delays or influence our profitability adversely.

The deployment of funds as stated in the "Objects of the Issue" beginning on page 88 of the Prospectus is entirely at the discretion of our management and has not been appraised by any independent agency. Further, the purposes for which the Net Proceeds are to be utilized have not been appraised by an independent entity and are based on our estimates. In the event, for whatsoever reason, we are unable to execute our plans, we could have a significant amount of unallocated net proceeds.

In such a situation, we would have broad discretion in allocating these net proceeds from the Issue without any action or approval of our shareholders. In case the assumptions on which these estimates have been made are not correct or they become un-realistic then there will be a variation in the estimates and the actual expenditure incurred which could result in execution delays and have an adverse effect on our operations and profitability. The cost estimated by our management are based on their experience. However, we may have to reconsider our estimates or business plans due to changes in underlying factors, some of which are beyond our control, such as interest rate fluctuations, changes in input cost and other financial and operational factors. Accordingly, prospective investors in the issue will need to rely upon our management's judgment with respect to the use of proceeds. 58. The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price.

The issue price of the equity shares has been based on many factors and may not be indicative of the market price of our Equity Shares after the Issue. For further information please refer the section titled "Basis for Issue Price" beginning on page 98 of the Prospectus. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price.

59. Any future issue of Equity Shares may dilute your shareholding and sales of our Equity Shares by our Promoters or other major shareholders may adversely affect the trading price of the Equity Shares.

Any future equity issues by us, including in a primary offering, may lead to the dilution of investors' shareholdings in us. Any future equity issuances by us or sales of its Equity Shares by the Promoters may adversely affect the trading price of the Equity Shares. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Equity Shares.

60. You may be subject to Indian taxes arising out of capital gains on the sale of our Equity Shares.

Under current Indian tax laws, capital gains arising from the sale of equity shares within 12 months in an Indian company are generally taxable in India. Any gain realized on the sale of listed equity shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if Securities Transaction Tax ("STT"), is paid on the transaction. STT is levied on and collected by a domestic stock exchange on which equity shares are sold. Any gain realized on the sale of equity shares held for more than 12 months to an Indian resident, which are sold other than on a recognized stock exchange and on which no STT has been paid, is subject to long term capital gains tax in India. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. Capital gains arising from the sale of equity shares are exempt from taxation in India where an exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable to pay tax in India as well as in their own jurisdiction on a gain on the sale of equity shares.

EXTERNAL RISK FACTORS

61. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, change in regulatory framework, inflation, deflation, foreign exchange fluctuations, consumer credit availability, consumer debt levels, unemployment trends, terrorist threats and activities, worldwide military and domestic disturbances and conflicts, and other matters that influence consumer confidence, spending and tourism.

62. Political, Economic and Social changes in India could adversely affect our business.

Our business, and the market price and liquidity of our Company's shares, may be affected by changes in Government policies, including taxation, social, political, economic or other developments in or affecting India could also adversely affect our business. Since 1991, successive governments have pursued policies of economic liberalization and financial sector reforms including significantly relaxing restrictions on the private sector. In addition, any political instability in India may adversely affect the Indian economy and the Indian securities markets in general, which could also affect the trading price of our Equity Shares.

63. Our business is dependent on economic growth in India.

Our performance is dependent on the health of the overall Indian economy. There have been periods of slowdown in the economic growth of India. India economic growth is affected by various factors including domestic consumption and savings, balance of trade movements primarily resulting from export demand and movements in key imports, such as oil and oil products, and annual rainfall, which affect agricultural production. For example, in the monsoon of 2009. In the past, economic slowdowns have harmed industries and industrial development in the country. Any future slowdown in the Indian economy could harm our business, financial condition and results of operations.

64. The extent and reliability of Indian infrastructure could adversely affect our results of operations and financial condition.

India's physical infrastructure is less developed than that of many developed countries. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our normal business activity. Any deterioration of India's physical infrastructure would harm the national economy.

65. Global economic downturn and adverse market conditions could cause our business to suffer. A slowdown in economic growth in India could cause our business to suffer.

The developed economies of the world viz. U.S., Europe, Japan and others are in midst of a downturn affecting their economic condition and markets general business and consumer sentiment has been adversely affected due to the global slowdown and there can be no assurance whether the developed economies or the emerging market economies will see good economic growth in the near future. Consequently, this has also affected the global stock and commodity markets. Our performance and growth is directly related to the performance of the Indian economy. The performance of the Indian economy is dependent among other things on the interest rate, political and regulatory actions, liberalization policies, commodity and energy prices etc. A change in any of the factors would affect the growth prospects of the Indian economy, which may in turn adversely impact our results of operations, and consequently the price of our Equity Shares.

66. Any downgrading of India's debt rating by an independent agency may harm our ability to raise debt financing.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely affect our ability to raise additional financing and the interest rates and other commercial terms at which such additional financing is available. This could have a material adverse effect on our capital expenditure plans, business and financial performance.

67. Regional hostilities, terrorist attacks, communal disturbances, civil unrest and other acts of violence or war involving India and other countries may result in a loss of investor confidence and adversely affect the financial markets and our business.

Terrorist attacks, civil unrest and other acts of violence or war may negatively affect the Indian markets on which our Equity Shares will trade and also adversely affect the worldwide financial markets. In addition, the Asian region has from time-to-time experienced instances of civil unrest and hostilities among neighbouring countries. Hostilities and tensions may occur in the future and on a wider scale. Military activity or terrorist attacks in India, may result in investor concern about stability in the region, which may adversely affect the price of our Equity Shares. Events of this nature in the future, as well as social and civil unrest within other countries in the world, could influence the Indian economy and could have an adverse effect on the market for securities of Indian companies, including our Equity Shares.

68. Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, results of operations, financial condition and prospects.

Our business and financial performance could be adversely affected by changes in law or interpretations of existing, or the promulgation of new, laws, rules and regulations in India applicable to us and our business. For further details please refer to the chapter “Government and Other Approvals” beginning on page 219 for details of the laws currently applicable to us. There can be no assurance that the central or the state governments in India may not implement new regulations and policies which will require us to obtain approvals and licenses from the central or the state governments in India and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the implementation of the new regulations may have a material adverse effect on all our business, financial condition and results of operations. In addition, we may have to incur capital expenditures to comply with the requirements of any new regulations, which may also materially harm our results of operations.

Justification for holding period levels

Inventories	The historical holding days of inventories has been ranging from 224 days to 274 days during Fiscal 2023 to Fiscal 2025 and 575 days for six months ended 30 th September, 2025 (not annualised). The company generally maintain a high level of inventory during the last quarter of the year as major production happen during these periods and which are sold to the customer during the start of the academic season i.e. in CBSE boards schools sales occurs during the period February to March and the sales to State Boards happen majorly during March to June period. We further expect to maintain the strict inventories days in the range of 274 days for the Fiscal year 2026 and 2027.
Trade Receivables	The historical holding days of trade receivables has been ranging from 402 days, 362 days and 337 days during Fiscal 2023, Fiscal 2024 and Fiscal 2025 and 535 days for six months ended 30 th September, 2025 (not annualised). As per the current credit terms and prevalent trend of the industry & in order to expand company's operations, the holding level for debtors is anticipated at 337 Days to 338 days of total revenue from operations during Fiscal 2026 to 2027. The projected marginal increase in trade receivables days and in line with past year trend is a strategic decision aimed at fostering higher sales growth. We expect to stimulate increased sales volume and foster stronger customer relationships. Further, due to the seasonality of business the debtors increase at a higher level during the last quarter of financial year followed by first half and streamline gradually later quarters (major sales in CBSE boards schools occurs during the period February to March and the sales to State Boards happen majorly during March to June period).
Trade Payables	Past trend of Trade payables holding days has been in the range of 163 days, 218 days and 211 days approximately during Fiscal 2023, 2024 and Fiscal 2025 and 314 days for six months ended 30 th September, 2025 (not annualised). However, with additional working capital funding, our Company intends to maintain trade payables to 212 days during Fiscal 2026 to 2027 to avail cash discount as well as competitive purchase price to increase overall profitability of our Company. By reducing the time, it takes to settle our payables we aim to negotiate more favourable terms and conditions with our suppliers, enabling us to access competitive pricing for the services we receive.
Short-Term Advances	In routine business, Company has to make various short-term advances for the material and other third- party services to be used during the façade operations. Accordingly, in line with increase in business operations, there will be need to purchase materials and services by

	making advance payments to enhance cost efficiency of products, thereby there will be increase in short term loan and advances.
Other Current Liabilities	We have reserved some fund for the purpose of paying of loan installments, interest, daily expenses, operation cost for maintenance, duties & taxes.
Short term Provision	Short term provisions enable us to set aside funds to address any potential defects, recalls, or issues related to products etc, this help us to minimize downtime and losses. Since business is growing, we have allocated reserve fund for liabilities related to taxes, and other such regulatory compliances.

WORLD ECONOMIC OUTLOOK - GLOBAL PROSPECTS AND POLICIES

The global economy is at a critical juncture. Signs of stabilization were emerging through much of 2024, after a prolonged and challenging period of unprecedented shocks. Inflation, down from multidecade highs, followed a gradual though bumpy decline toward central bank

Sources: Haver Analytics; and IMF staff calculations.
Note: Panels 1 and 2 plot the median of a sample of 57 economies that accounts for 78 percent of World Economic Outlook world GDP (in weighted purchasing-power-parity terms) in 2024. Vertical axes are cut off at -2 percent and 12 percent. The bands depict the 25th to 75th percentiles of data across economies. “Core inflation” is the percent change in the consumer price index for goods and services, excluding food and energy (or the closest available measure). AEs = advanced economies; EMDs = emerging market and developing economies.

Note: In panel 1, India’s unemployment in urban areas is from Periodic Labour Force Survey data. The “lowest point” is from the period spanning March 2019 to the latest available data. In panel 2, “Europe” includes Austria, Belgium, Bulgaria, Croatia, Cyprus, the Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Latvia, Lithuania, Luxembourg, Malta, The Netherlands, Poland, Portugal, Romania, the Slovak Republic, Slovenia, Spain, and Sweden. The “peak” is from the period spanning January 2020 to the latest available data. Data labels in the figure use International Organization for Standardization (ISO) country codes. EA = euro area.

targets (Figure 1.1). Labor markets normalized, with unemployment and vacancy rates returning to prepandemic levels (Figure 1.2). Growth hovered around 3 percent in the past few years, and global output came close to potential (Figure 1.3).

However, major policy shifts are resetting the global trade system and giving rise to uncertainty that is once again testing the resilience of the global economy. Since February, the United States has announced multiple waves of tariffs against trading partners, some of which have invoked countermeasures. Markets first took the announcements mostly in stride, until the United States' near-universal application of tariffs on April 2, which triggered historic drops in major equity indices and spikes in bond yields, followed by a partial recovery after the pause and additional carve-outs announced on and after April 9. Despite significant equity market corrections in early March and April, price-to-earnings ratios in the United States remain at elevated levels in historical context, raising concerns about the potential for further disorderly corrections (April 2025 Global Financial Stability Report [GFSR]). Uncertainty, especially that regarding trade policy, has surged to unprecedented levels (Figure 1.4). The degree of the surge varies across countries, depending on exposures to protectionist measures through trade and financial linkages as well as broader geopolitical relationships.

These developments come against an already-cool ing economic momentum. Recent data on real activity have been disappointing, with GDP growth in the fourth quarter of 2024 trailing the forecasts in the January 2025 World Economic Outlook (WEO) Update. High-frequency indicators such as retail sales and purchasing managers' surveys point to slowing growth. In the United States, consumer, business, and investor sentiment was optimistic at the beginning of the year but has recently shifted to a notably more pessimistic stance as uncertainty has taken hold and new tariffs have been announced. In labor markets, hiring has slowed in many countries, and layoffs have risen. Meanwhile, progress on disinflation has mostly stalled, and inflation has edged upward in some cases, with an increasing number of countries exceeding their inflation targets. Services inflation, though still on a downward trend, remains above levels prior to the inflation surge, and core goods inflation has seen an uptick since November 2024. Trade has held up, but this is mostly because

⁷ The assumed inflation rates for 2025 and 2026, respectively, are as follows: 2.1 percent and 1.9 percent for the euro area, 2.4 percent and 1.7 percent for Japan, and 3.0 percent and 2.5 percent for the United States.

of an increase in Chinese exports and US imports at the end of 2024, with consumers and businesses likely front-loading ahead of tariffs that were anticipated back then and now are in place.

In the backdrop, domestic imbalances and policy gaps give rise to unbalanced growth while opening up potential fragilities. In some countries, such as China, growth in 2024 has been mainly supported by external demand. On the contrary, in the United States, private consumption—traditionally the major contributor to GDP growth—as a share of GDP has reached its highest point during the 2020s, and the fiscal deficit remains historically large. Within-country inequalities in households' income gains signal another potential vulnerability. In some cases, real GDP has recovered, but real GDP per capita has not (Figure 1.5, panel 1). In others, median income has fallen behind, whereas incomes at the top and bottom of the distribution have recovered. Meanwhile, salient indicators of the cost of living, such as house prices and rents, have increased substantially (Figure 1.5, panel 2).

The stable performance of the global economy in the past couple of years hides important differences across countries. These differences are the result of diverse shocks, structural characteristics, and policy actions. They manifest themselves in varying cyclical positions and structural forces determining the outlook.

Growth Forecast

In the near term, under the reference forecast, global growth is projected to fall from an estimated 3.3 percent in 2024 to 2.8 percent in 2025, before recovering to 3 percent in 2026. This is lower than the projections in the January 2025 WEO Update, by 0.5 percentage point for 2025 and 0.3 percentage point for 2026, with downward

revisions for nearly all countries (Tables 1.1 and 1.2). The downgrades are broad-based across countries and reflect in large part the direct effects of the new trade measures and their indirect effects through trade linkage spillovers, heightened uncertainty, and deteriorating sentiment. As indicated in the illustrative model simulations presented in Box 1.2, the growth impact of tariffs in the short term varies across countries, depending on trade relationships, industry compositions, policy responses, and opportunities for trade diversification. Fiscal support in some cases (for example, China, euro area) offsets some of the negative growth impact.

World Trade Outlook

Global trade growth is expected to slow down in 2025 to 1.7 percentage point, a downward revision of 1.5 percentage point since the January 2025 WEO Update. This forecast reflects increased tariff restrictions affecting trade flows and, to a lesser extent, the waning effects of cyclical factors that have underpinned the recent rise in goods trade.

Meanwhile, global current account balances are expected to narrow somewhat (Figure 1.19). The widening of current account balances in 2024 reflected widening domestic imbalances and a pickup in global goods trade. Over the medium term, global balances are expected to narrow gradually as the effects of these factors wane. Creditor and debtor stock positions are estimated to have increased in 2024, with the increases reflecting widening current account balances. They are expected to moderate slightly over the medium term as current account balances gradually narrow. In some economies, gross external liabilities remain large from a historical perspective and pose risks of external stress.

India's Gross Domestic Production

INDIAN ECONOMIC OVERVIEW

Introduction

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. Nominal GDP for FY25 is estimated at Rs. 33.10 lakh crore (US\$ 3.8 trillion) with growth rate of 9.9%, compared to Rs. 30.12 lakh crore (US\$ 3.5 trillion) in FY24. Strong domestic demand for consumption and investment, along with Government's continued emphasis on capital expenditure are seen as among the key driver of the GDP in the second half of FY25. In FY25, India's exports stood at Rs. 37.31 lakh crore (US\$ 433.56 billion), with Engineering Goods (26.88%), Petroleum Products (13.86%) and electronic goods (8.89%) being the top three exported commodity. Rising employment and increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing.

In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers. The contact-based services sector has demonstrated promise to boost growth by unleashing the pent-up demand. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

India's appeal as a destination for investments has grown stronger and more sustainable because of the current period of global unpredictability and volatility, and the record amounts of money raised by India-focused funds in 2022 are evidence of investor faith in the "Invest in India" narrative.

Market size

Real GDP for FY25 is estimated at Rs. 187.95 lakh crores (US\$ 2.2 trillion) with growth rate of 6.5%, compared to Rs. 176.51 lakh crore (US\$ 2.06 trillion) for FY24. As on Jan 2025, there are 118 unicorn startups in India, with a combined valuation of over Rs. 3.0 lakh crore (US\$ 354 billion). The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil sources by 2030. India is committed to achieving the

country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 to 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between same time periods. The Current Account Deficit (CAD) stood at Rs. 98,095 crore (US\$ 11.5 billion) for Q3 of FY25 as compared to Rs. 88,712 crore (US\$ 10.4 billion) in Q3 of FY24. This was largely due to increase in merchandise trade deficit.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles Mr. Piyush Goyal, Indian exports are expected to reach US\$ 1 trillion by 2030.

Recent Developments

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy. According to World Bank, India must continue to prioritise lowering inequality while also putting growth-oriented policies into place to boost the economy. In view of this, there have been some developments that have taken place in the recent past. Some of them are mentioned below.

- The HSBC India Manufacturing PMI increased to 58.4 in April 2025, up from 58.1 in March 2025, based on preliminary estimates. This rise signifies improved operating conditions and represents the most rapid growth pace observed in the past year. Contributing factors include a notable surge in new export orders, which experienced their most significant increase in over fifteen years, alongside a faster expansion in overall new business activity.
- In Q1 CY25, private equity (PE) and venture capital (VC) investments stood at Rs. 1,16,861 crore (US\$ 13.7 billion) across 284 deals.
- India saw a robust 10.35% growth in passengers carried by domestic airlines at 431.98 lakh in FY25, from 391.46 lakh in FY24, according to the Directorate General of Civil Aviation (DGCA).
- As of April 18, 2025, India's foreign exchange reserves stood at Rs. 58,57,537 crore (US\$ 686.70 billion).
- India secured 39th position out of 133 economies in the Global Innovation Index 2024. India rose from 81st position in 2015 to 39th position in 2024. India ranks 3rd position in the global number of scientific publications.
- The gross GST (Goods and Services Tax) revenue collection stood at Rs. 1.84 lakh crore (US\$ 21.57 billion) in February 2025.
- Between April 2000–December 2024, cumulative FDI equity inflows to India stood at Rs. 89.88 lakh crore (US\$ 1.05 trillion).
- In February 2025, the overall IIP (Index of Industrial Production) stood at 151.3. The Indices of Industrial Production for the mining, manufacturing and electricity sectors stood at 141.9, 148.6 and 194.0, respectively.
- According to data released by the Ministry of Statistics & Programme Implementation (MoSPI), India's Consumer Price Index (CPI) – Combined inflation was 3.34% in March 2025 against 4.85% in March 2024.

-
- Foreign Institutional Investors (FII) inflows in FY25 were close to Rs. 1.27 lakh crore (US\$ 14.89 billion), while Domestic Institutional Investors (DII) bought Rs. 6.00 lakh crore (US\$ 70.34 billion) in the same period.
 - India's wheat procurement rose 34% YoY, reaching 22.36 MT as of April 28, 2025, with target of 31 MT in sight. Strong MSP, bonuses, and robust crop output boost sales to government agencies, ensuring food security and potential for open market intervention.

Government Initiatives

Over the years, the Indian government has introduced many initiatives to strengthen the nation's economy. The Indian government has been effective in developing policies and programmes that are not only beneficial for citizens to improve their financial stability but also for the overall growth of the economy. Over recent decades, India's rapid economic growth has led to a substantial increase in its demand for exports. Besides this, a number of the government's flagship programmes, including Make in India, Start-up India, Digital India, the Smart City Mission, and the Atal Mission for Rejuvenation and Urban Transformation, is aimed at creating immense opportunities in India. In this regard, some of the initiatives taken by the government to improve the economic condition of the country are mentioned below:

- According to a report by Wood Mackenzie in January 2025, India, the United States, and West Asia are expected to collectively add 100 Gigawatts (GW) of solar capacity by 2025, while China is anticipated to continue its leadership in the solar industry.
- In July 2024, the Ministry of Finance held the Union Budget and announced that for 2024-25, the total receipts other than borrowings and the total expenditure are estimated at Rs. 32.07 lakh crore (US\$ 383.93 billion) and Rs. 48.21 lakh crore (US\$ 577.16 billion), respectively.
- In February 2024, the Finance Ministry announced the total expenditure in Interim 2024-25 estimated at Rs. 47,65,768 crore (US\$ 571.64 billion) of which total capital expenditure is Rs. 11,11,111 crore (US\$ 133.27 billion).
- On January 22, 2024, Prime Minister Mr. Narendra Modi announced the 'Pradhan Mantri Suryodaya Yojana'. Under this scheme, 1 crore households will receive rooftop solar installations.
- On September 17, 2023, Prime Minister Mr. Narendra Modi launched the Central Sector Scheme PM-VISHWAKARMA in New Delhi. The new scheme aims to provide recognition and comprehensive support to traditional artisans & craftsmen who work with their hands and basic tools. This initiative is designed to enhance the quality, scale, and reach of their products, as well as to integrate them with MSME value chains.
- On August 6, 2023, Amrit Bharat Station Scheme was launched to transform and revitalize 1309 railway stations across the nation. This scheme envisages development of stations on a continuous basis with a long-term vision.
- On June 28, 2023, the Ministry of Environment, Forests, and Climate Change introduced the 'Draft Carbon Credit Trading Scheme, 2023'.
- From April 1, 2023, Foreign Trade Policy 2023 was unveiled to create an enabling ecosystem to support the philosophy of 'Aatmanirbhar Bharat' and 'Local goes Global'.
- To enhance India's manufacturing capabilities by increasing investment and production in the sector, the government of India has introduced the Production Linked Incentive Scheme (PLI) for Pharmaceuticals.
- Prime Minister's Development Initiative for North-East Region (PM-DevINE) was announced in the Union Budget 2022-23 with a financial outlay of Rs. 1,500 crore (US\$ 182.35 million).

- Prime Minister Mr Narendra Modi has inaugurated a new food security scheme for providing free food grains to Antyodaya Ann Yojna (AAJ) & Primary Household (PHH) beneficiaries, called Pradhan Mantri Garib Kalyan Ann Yojana (PMGKAY) from January 1, 2023.

Road Ahead

India's economy grew by 6.2% in Q3 FY25. Signs of recovery are now visible, with growth expected to rise to 7.6% in Q4 FY25—indicating a possible turnaround in the coming months. India's comparatively strong position in the external sector reflects the country's positive outlook for economic growth and rising employment rates. India ranked 5th in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of FY24 highlighted the unwavering support the government gave to its capital expenditure, which, in FY24, stood 37.4% higher than the same period last year. In the Union Budget of FY26, capital expenditure took lead by steeply increasing the capital expenditure outlay by 10.0% to Rs. 11.21 lakh crore (US\$ 131.42 billion) over Rs. 10.18 lakh crore (US\$ 119.34 billion) in FY25. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

India's total exports of goods and services rose by 5.5% to a record Rs. 69.8 lakh crore (US\$ 820.9 billion) in FY25, compared to Rs. 65.8 lakh crore (US\$ 773.0 billion) in FY24.

With a reduction in port congestion, supply networks are being restored. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

Business Overview

Dachepalli Publishers Limited is an established content-based educational publishing house dedicated to serving the K-12 segment across CBSE, ICSE, and State Board curriculums. We provide high-quality textbooks along with partnering with various schools ranging from the capacity of 100 to 50,000 students as a comprehensive academic support system. Our integrated content and support services are designed to empower educators, streamline academic delivery, and enhance student learning outcomes across all grade levels.

Founded in 1998 by Mr. Vinod Kumar Dachepalli and Mr. Rushikesh Dachepally as a private limited entity, Dachepalli Publishers Limited traces its roots back to a modest bookstall established by their forefather in the early 1900s. Initially focused on retailing textbooks and magazines, the business gradually evolved to meet the growing educational needs of the region, expanding into publishing Urdu textbooks, diaries, and eventually comprehensive academic content. With over a century of legacy in the book trade, the Dachepalli name has become deeply trusted and widely recognized across the states we operate in. This longstanding presence gives us a significant edge in building credibility and fostering long-term relationships with schools, educators, and retailers alike.

As of 2025, our portfolio features over 600 titles distributed under six prominent brands: Dachepalli publishers Limited, Apple Book Company, Orange Leaf Publishers, Pelican Publishing House, Sangam Publishing House, and School Book Company. Alongside printed materials, we provide schools with curriculum-aligned digital resources at no additional cost. Upon purchasing our textbooks, schools gain access to a range of educational tools – including instructional videos, a test generator, and other academic software – installed directly within their premises. This approach not only helps schools become digitally empowered with tailored technology but also allows them to avoid the high costs of third-party software. Because our digital tools are designed exclusively to complement our textbooks, schools that enroll on our platform tend to maintain their partnership with us for 3 to 4 years, benefiting from a seamless and integrated academic ecosystem.

At Dachepalli Publishers Limited, we integrate technology thoughtfully across all age groups, aligning with the developmental stages outlined in the National Education Policy (NEP) 2020 and the National Curriculum Framework (NCF).

i. A. Foundational Stage (Ages 3–8)

Pre-primary to Class 2

We introduce technology at this stage with great care, keeping in mind the child’s developmental needs and sensitivity to screen time. Our digital resources are:

-
- Age-appropriate and simple: Short animated videos, rhymes, object identification activities, and storytelling.
 - Designed for play-based learning, fostering curiosity, creativity, and early cognitive development.
 - Limited in screen exposure, with a greater focus on hands-on activities and interactive classroom exercises.

Our approach reflects the NCF's emphasis on experiential and discovery-based learning, supporting joyful education in a balanced way. These resources are installed directly within school premises, ensuring easy access without the need for personal devices.

ii. B. Preparatory Stage (Ages 8–11)

Classes 3 to 5

At this stage, we expand digital engagement with:

- A blend of e-learning tools, activity-based content, and recorded video lessons.
- Resources that simplify abstract concepts and enhance understanding through visual and auditory learning.
- Tools that support foundational literacy and numeracy, in line with NEP 2020 priorities.

Our materials act as both classroom teaching aids and self-paced learning tools, allowing students to review and reinforce lessons independently. This stage helps lay the groundwork for independent thinking and academic confidence.

iii. C. Middle Stage (Ages 11–14)

Classes 6 to 8

We build on earlier foundations by introducing:

- Deeper, subject-oriented content, aligned with textbook chapters.
- Recorded classes by expert educators, featuring detailed concept explanations, step-by-step solutions, and real-life examples.
- Tools that develop critical thinking, analysis, and problem-solving skills.

iv. D. Secondary Stage (Ages 14–18)

Classes 9 to 10

In the secondary stage, our digital solutions are designed to:

- Support deep subject mastery and exam readiness.
- Offer comprehensive recorded lessons with detailed walkthroughs of advanced topics in subjects like Mathematics, Science, and Social Studies.
- Include concept clarification, test preparation, and application-based examples that reflect real-world relevance.

Our platform serves as a cost-effective alternative to private tuition, especially beneficial in areas where access to quality teaching is limited. Since our digital tools are fully aligned with our textbooks, schools that adopt our solutions enjoy a cohesive and streamlined academic experience.

By installing these tools within school infrastructure – free of charge for schools that adopt our textbooks – we not only provide access to powerful learning resources but also help institutions modernize affordably. This

integrated system encourages long-term school partnerships, with institutions typically staying with our platform for 3 to 4 years or more due to the seamless alignment between content, technology, and pedagogy.

3. Consumer-Centric Educational Content

We provide educational content for ICSE, CBSE, and State Board schools across India, supporting students throughout their academic journey. Our content is rooted in a consumer-centric philosophy, continuously evolving based on direct feedback from students, educators, and schools. We work closely with various contractual experienced authors, ensuring that our textbooks and digital resources are both academically rigorous and classroom-relevant.

Our author engagement begins with a structured and merit-driven selection process. Authors are encouraged to submit a comprehensive book proposal along with sample chapters that demonstrate their subject knowledge, pedagogical approach, and suitability for the target market. These submissions undergo a detailed evaluation by our editorial managers, who assess them based on:

- Curriculum requirements and syllabus alignment
- Academic depth and teaching methodology
- Market needs and gaps in current offerings
- Comparative analysis with existing and competing titles
- Regional content relevance and demand

Based on this multi-layered review, authors may be requested to revise their manuscripts to better match our editorial standards and market expectations. In cases where the content does not meet our publishing criteria or lacks differentiation, it may be respectfully declined with constructive feedback.

If a manuscript is accepted, our team collaborates with the author to finalize the project outline. This includes timelines, scope of work, payment terms, and other contractual terms, ensuring transparency and professionalism.

A key strength of our offerings lies in our commitment to pedagogical excellence. All our content is developed using NEP-compliant pedagogy, with a strong emphasis on activity-based learning. This approach encourages students to learn by doing – fostering conceptual understanding, critical thinking, collaboration, and creativity. Whether through hands-on exercises, project work, discussions, or interactive activities, our learning materials are designed to actively engage students and make learning meaningful and enjoyable. This pedagogical foundation ensures that our content not only aligns with national education standards but also supports holistic development and 21st-century skill-building.

4. Strong Market Position in the K-12 Education Segment

We hold a strong and sustained position in the Indian K-12 education sector, with 100% of our revenue derived from the sale of educational content and curriculum-aligned titles across this segment. Our reach spans CBSE, ICSE, and various State Board-affiliated schools, with a particularly deep-rooted presence in South India.

Our content portfolio, historically anchored in high-quality print publications, has progressively evolved to include digitally integrated learning solutions through WeStudy – our educational technology suite. Installed directly within school premises, WeStudy provides access to a wide range of digital tools such as video lessons, test generators, and interactive resources that are specifically aligned with our textbooks. This approach allows schools to adopt modern, cost-effective educational technology without relying on expensive third-party

platforms. We distribute our content under multiple well-established brands and operate through an extensive and highly effective sales and distribution network. This network has enabled us to build strong, long-term relationships with schools, leading to consistent placements of our titles on prescribed and recommended reading lists.

As schools integrate our textbooks and adopt our technology suite, we gain multiple touch points with educators, students, and parents, driving familiarity, trust, and brand loyalty. This ecosystem not only strengthens our market presence but also ensures year-on-year revenue growth and sustained influence in the highly competitive K-12 education landscape.

5. Established Network for Content Development and In-House Printing

We have developed a well-integrated and efficient ecosystem for both content creation and book production, supported by a trusted network of experienced authors, content writers, and subject matter experts. Our editorial team works closely with these professionals to ensure that every title is pedagogically sound, curriculum-aligned, and reflective of current educational trends across the K-12 segment.

Once the content is finalized, our in-house design team enhances each title with a strong visual layout to ensure clarity, engagement, and ease of learning for students. What truly sets us apart is our comprehensive in-house printing infrastructure, which allows us to maintain complete control over quality, cost, and turnaround times.

We manage around 85% of our total printing operations internally, overseeing every stage from pre-press to lamination, binding, and finishing. This vertical integration enables us to:

- Uphold strict quality control standards
- Respond swiftly to changes in curriculum or demand
- Ensure timely delivery, especially during peak academic seasons
- Minimize production costs and dependency on third-party vendors
- Avoid delays during reprints, since outside printers are often overbooked during the academic rush. Having our own press allows us to react quickly to fluctuating demand and ensure on-time delivery, particularly around the critical school reopening period, when timely supply is non-negotiable for our partner schools.

To meet seasonal demand surges, we strategically outsource the remaining 15% of our production to trusted print partners, while maintaining our quality and delivery benchmarks.

We also directly procure key raw materials—including paper, ink, plates, and binding supplies—giving us greater cost control and supply stability. This operational model is further supported by long-standing vendor relationships that reinforce our ability to deliver reliably throughout the academic calendar.

This end-to-end integration, from content development to production and supply, ensures we can consistently meet market demand with quality and punctuality, making us a dependable partner for schools across India.

6. Extensive Sales and Distribution Network

We have established a strong and far-reaching sales and distribution network that spans 10 states and union territories, supported by a robust base of over 300 distributors and dealers. This network enables us to ensure consistent availability of our educational content across diverse regions of India, including urban and semi-urban markets. Our dedicated sales team actively engages with key stakeholders such as educators, students, schools, distributors, and retailers, creating multiple touch points that strengthen our market presence.

To deepen market penetration and enhance brand visibility, our team undertakes a range of targeted strategic initiatives, including regular school visits, retailer-level display campaigns, participation in educational tradeshows, sponsorship of academic events, and the organization of teacher workshops. These initiatives not only promote our existing titles but also serve as direct feedback channels, helping us refine our offerings and identify new opportunities.

2. Strengthening Technology-Enabled Systems

As the education sector rapidly evolves, we are committed to integrating advanced technology solutions that enhance teaching and learning experiences. Our strategy is to deliver comprehensive, end-to-end educational content through both print and digital media, ensuring that we cater to the changing preferences of schools, educators, and students. We are continuously adopting state-of-the-art educational technologies to improve the accessibility, interactivity, and adaptability of our content. These solutions support blended learning environments, making it easier for educators to deliver lessons and for students to engage with content both inside and outside the classroom. Our digital learning tools are designed to offer clear explanations, curriculum mapping, assessments, and personalized learning paths—helping schools stay ahead in today’s tech-enabled education landscape. To complement this, we also provide training and support to our partner schools and educators, ensuring they can effectively integrate and maximize the value of our digital offerings. Our strong distribution network and long-standing relationships with schools give us a unique advantage in promoting the adoption of these solutions at scale.

3. Focus on Talent Acquisition and Development

We believe that the strength of our business lies in the people behind our products. From content creation to marketing and sales, attracting and nurturing top talent remains a strategic priority. Our content development efforts are enriched by a team of experienced authors, editors, academic advisors, and subject matter experts, many of whom have deep experience in teaching and curriculum design.

Our sales team plays a crucial dual role: not only driving revenue growth but also acting as scouts for academic talent. Through regular engagement with schools, our sales representatives identify skilled educators who show potential to contribute as content writers or subject consultants. These individuals are brought into our content pipeline through a rigorous selection process, which includes submitting sample content for review by our in-house academic and editorial teams to ensure quality and alignment with our educational philosophy.

We intend to invest in continuous training and development of our team to ensure that our teams stay aligned with curriculum changes, educational policy updates (such as NEP 2020), and emerging market trends. By building strong, capable teams across all departments, we position ourselves to respond swiftly to market demands and continuously enhance the value we deliver to our customers.

4. District-Level Expansion through Localized Staffing Strategy

As part of our strategic expansion into new states across India, we intend to adopt a district-focused operational model that goes beyond distribution. We intend to invest in employing and training staff at the district level to ensure deeper penetration and stronger community engagement. By empowering district-level employees and embedding our presence deeper within each community, we can ensure that our growth is both scalable and sustainable. This bottom-up approach, focused on building grassroots relationships and operational efficiency, positions us to expand meaningfully across geographies—one district at a time.

5. Collaborative, Risk-Optimized Distribution Model

At Dachepalli Publishers, we believe in building a robust, scalable, and low-risk distribution ecosystem that ensures sustained growth and reliable market coverage. Unlike conventional models that rely on a single state-level distributor, we follow a multi-partner approach, empowering a network of district-level distribution partners who are carefully selected based on their local reach, entrepreneurial drive, and long-term vision. This decentralized model allows us to tap into the strengths of multiple enthusiastic partners across each state,

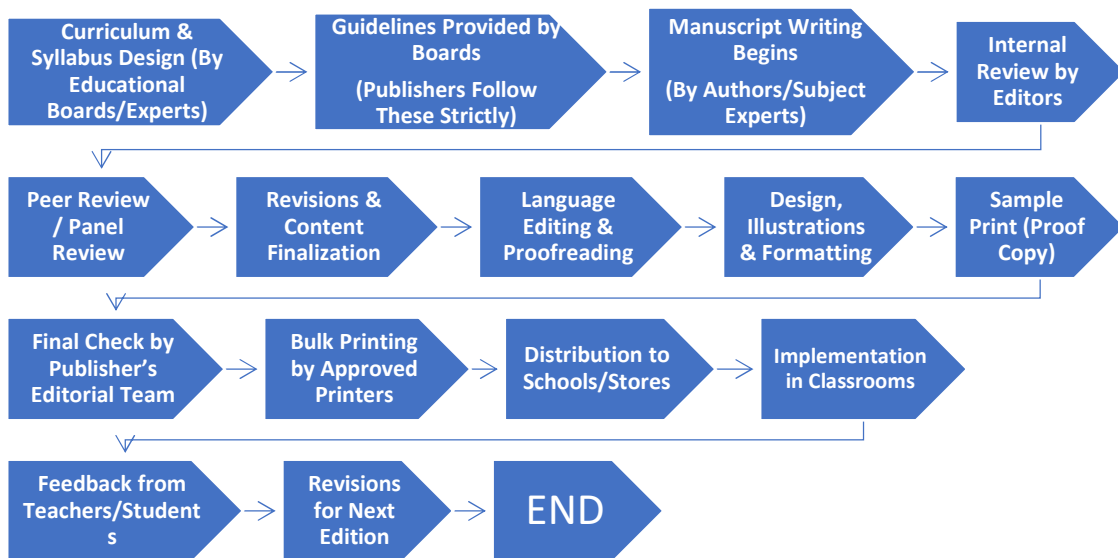

rather than placing the responsibility – and risk – on a single individual or entity. Each regional distributor is supported by a dedicated company team, which includes trained academic and field staff who actively promote our textbooks in schools, conduct orientation sessions, and build strong institutional relationships.

By splitting distribution across multiple stakeholders, we not only mitigate business risk but also create a more agile and responsive supply chain. This approach helps us achieve deeper market penetration, ensures faster decision-making, and builds a network of committed partners who grow alongside us. Ultimately, this model fosters a sense of shared ownership and collaboration, enabling us to scale faster, serve schools better, and maintain consistent brand presence across districts – laying the foundation for sustainable expansion in every state we enter.

PUBLISHING OF TEXTBOOK PROCESS:

The journey of publishing a school book begins with the Curriculum and Syllabus Design, which is developed by educational boards and subject experts. Once the curriculum is defined, detailed guidelines are issued by the boards to ensure uniformity, and publishers use these guidelines as a foundation for book development. The process then moves to manuscript writing, carried out by qualified authors or subject experts. After the manuscript is drafted, it goes through an internal review by the editorial team followed by a peer or panel review involving academic evaluators. Based on their feedback, necessary revisions and content finalization are done. Next comes language editing and proofreading, ensuring the text is clear, correct, and age-appropriate. This is followed by design, illustrations, and formatting, where visual elements and layouts are prepared. A sample print or proof copy is then produced for final inspection. The publisher’s editorial team conducts a thorough final check, ensuring accuracy and readiness for production. Once approved, the book goes into bulk printing, handled by authorized and experienced printing vendors.

Post-printing, books are distributed to schools, bookstores, or educational institutions. Once implemented in classrooms, feedback is collected from teachers and students, which helps in assessing the book’s effectiveness. This valuable feedback is used during the revision phase for the next edition, ensuring continuous improvement in content and presentation. Thus, the publishing journey concludes, ready to begin again with the next curriculum cycle.

THE JOURNEY OF PRINTING THE BOOK IS AS FOLLOWS:

Flow chart of printing of a Book:

- Fresh prints are dried naturally or with infrared heaters
- Paper rests to avoid curling or ink smudging

Folding & Collating
- Printed sheets are folded into sections (signatures)
- Multiple signatures are collected in correct order

Binding Stage
- **Perfect Binding** (glue, common for textbooks)
- **Saddle Stitching** (staples, for thin booklets)
- **Hardcover Binding** (for premium editions)

Trimming & Final Finishing
- Extra edges are trimmed cleanly
- Add-ons like lamination, UV coating, spot varnish, embossing, or foil stamping applied

Final Quality Inspection
- Random books from the batch are checked for:
→ Missing pages, colour issues, binding strength, print clarity, and finish quality

Packing & Labelling
- Books packed in cartons with proper labels
- Palletizing for bulk transport (if needed)

Dispatch & Distribution
- Sent to warehouses, schools, or distributors
- May involve tracking, delivery receipts, and stock updates

The Journey of Printing a Textbook: Step-by-Step Process

The printing of a textbook is a meticulous process that transforms finalized content into a physical book that reaches students and classrooms. This journey involves a blend of technology, quality control, and precision logistics. The process ensures that carefully developed educational content becomes a high-quality, accessible product for students and teachers. Every stage – from pre-press to binding – involves precision and quality control, reflecting the book’s importance in shaping young minds.

1. Final Content & Layout Approval

Once the content has been written, reviewed, edited, and designed, the publisher approves the final layout. This version includes:

- Fully formatted pages
- Placement of images, graphs, and charts
- Consistent typography and design
- Chapter headings, page numbers, and index

No changes are made after this stage; it's the final version that moves into production.

2. Pre-Press Preparation

In this crucial technical phase, the book is prepared for mass printing. This includes:

- Converting files to industry-standard formats like PDF/X
- Ensuring fonts are embedded to avoid printing errors
- Setting trim marks, bleeds, and margins so that the printed pages are aligned and nothing is cut off
- Color conversion to CMYK for accurate ink-based printing
- Imposition, where pages are arranged in a way that, when folded, they appear in the correct order

This stage bridges the digital world and physical production.

3. Proof Print / Dummy Copy

Before bulk printing, a proof copy or “dummy” is printed. This is a physical test print of the actual book and helps detect:

- Misaligned text or images
- Color mismatches
- Missing elements or formatting issues

This copy is reviewed not just by editors but often by printers and designers as well.

4. Internal Proof Checking

The printed proof is carefully checked by:

- Editors, for content accuracy and layout
- Proofreaders, for language or typographical errors
- Technical experts, for print quality and binding compatibility

If any errors are found, they are corrected and a final print-ready version is locked in.

5. Paper Type & Size Finalization

The printing team selects the type of paper best suited for the textbook. Choices are based on:

- GSM (grams per square meter): heavier GSM means thicker paper
- Texture: matte for writing comfort or glossy for vibrant images

- Size: A4, demy, or customized sizes as per syllabus needs

Large quantities of paper are ordered in rolls or sheets to feed the printing machines.

6. Plate Making (Offset Printing)

Using Computer-to-Plate (CTP) technology, aluminum plates are created for each page. These plates carry the image/text for:

- Cyan (C)
- Magenta (M)
- Yellow (Y)
- Black (K)

These four-color layers combine to create full-color images in the final print. Each page may require four individual plates.

7. Offset Printing Process

Now begins mass production. Using high-speed offset printing machines:

- Plates transfer ink onto rubber rollers, which then print onto the paper
- Paper is fed continuously in large sheets or rolls
- Operators monitor color consistency, registration, and ink density

This method is fast, economical, and ideal for large print runs.

8. Drying & Paper Conditioning

Once printed, the sheets are dried:

- Naturally, or using infrared heaters
- Proper conditioning prevents ink smudging and paper warping
- Sheets are allowed to rest before moving to folding and binding

This step ensures the final product is clean, flat, and dry.

9. Folding & Collating

Printed sheets are now folded into "signatures" – small booklets of 8, 16, or 32 pages. These are:

- Collated (collected) in sequence
- Aligned correctly to form a complete book

Manual or automatic machines handle this with high precision.

10. Binding Stage

Depending on the book's thickness and purpose, one of the following binding methods is used:

- Perfect Binding: Glue-based spine; most common for textbooks
- Saddle Stitching: Staples in the center; used for thin booklets
- Hardcover Binding: Rigid covers for durability; used in premium or archival editions

Covers are printed separately and attached during this stage.

11. Trimming & Final Finishing

The books are trimmed on all three edges (top, bottom, outer side) to ensure uniform size. Final finishing options may include:

- Lamination: A protective plastic layer (matte or gloss)
- UV Coating: For shine or texture on the cover
- Foil Stamping or Embossing: Adds texture and elegance to title logos

This enhances both appearance and durability.

12. Final Quality Inspection

To ensure high standards, a random selection of books from the batch undergo:

- Page count verification
- Ink and color checks
- Binding strength tests
- Visual inspection for defects or misprints

Defective copies are removed before packing.

13. Packing & Labelling

Books are:

- Shrink-wrapped (if needed)
- Packed in cardboard cartons
- Labelled with titles, grade, quantity, and batch info
- Sometimes palletized for easy bulk transport

Proper packaging protects books during shipping.

14. Dispatch & Distribution

Books are dispatched to:

- Warehouses for storage
- Schools directly for academic use
- Bookstores or online distributors

This stage includes shipment tracking, delivery documentation, and stock updates in inventory systems.

The rules prohibit the use of carry bags made of plastics less than 50 microns thick and encourage the use of biodegradable alternatives. Further, the Ministry of Environment and Forests looks into Environment Impact Assessment. The Ministry receives proposals for expansion, modernization and setting up of projects and the impact which such projects would have on the environment which is assessed by the Ministry in detail before granting clearances for such proposed projects.

National Environmental Policy, 2006

This Policy seeks to extend the coverage, and fill in gaps that still exist, in light of present knowledge and accumulated experience. This policy was prepared through an intensive process of consultation within the Government and inputs from experts. It does not displace, but builds on the earlier policies. It is a statement of India's commitment to making a positive contribution to international efforts. This is a response to our national commitment to a clean environment, mandated in the Constitution in Articles 48 A and 51 A (g), strengthened by judicial interpretation of Article 21. The dominant theme of this policy is that while conservation of environmental resources is necessary to secure livelihoods and well-being of all, the most secure basis for conservation is to ensure that people dependent on particular resources obtain better livelihoods from the fact of conservation, than from degradation of the resource.

Transactions made within a single state are levied with Central GST (CGST) by the Central Government and State GST (SGST) by the government of that state. For inter-state transactions and imported goods or services, an Integrated GST (IGST) is levied by the Central Government. GST is a consumption-based tax; therefore, taxes are paid to the state where the goods or services are consumed and not the state in which they were produced.

It grants rights such as reproduction, distribution, and communication of the work to the public, ensuring creators can benefit economically from their creations. The Act also outlines provisions for copyright infringement, fair use exceptions, and the duration of copyright protection, which typically lasts the creator's lifetime plus 60 years. Amendments have modernized the Act, addressing issues like digital rights management and extending protections for performers and broadcasters.

DIGITAL OPERATIONS AND DATA SECURITY

Information Technology Act, 2000

The Information Technology Act, 2000, is India's primary law governing electronic commerce, cybersecurity, and digital transactions. It provides legal recognition to electronic records, digital signatures, and e-governance, ensuring validity for electronic contracts. The Act addresses cybercrimes such as hacking, identity theft, data breaches, and online fraud, prescribing penalties and punishments for offenses. It also establishes the framework for certifying authorities to regulate digital signatures and empowers intermediaries, such as internet service providers, with safe harbor protections, provided they comply with due diligence. Amendments have expanded the Act's scope to include privacy protection and combatting modern cybersecurity challenges.

The Information Technology (Reasonable Security Practices and Procedures and Sensitive Personal Data or Information) Rules, 2011

The Information Technology (Reasonable Security Practices and Procedures and Sensitive Personal Data or Information) Rules, 2011, under the Information Technology Act, 2000, set guidelines for protecting sensitive personal data in India. These rules require companies to implement "reasonable security practices and procedures" to safeguard personal data from unauthorized access, disclosure, and misuse. They define "sensitive personal data" to include information such as financial details, health records, and biometric data, and outline specific obligations for businesses to collect, store, and process such data. Key provisions include obtaining explicit consent from individuals for data collection, ensuring data storage and processing comply with the prescribed standards, and notifying users of data breaches. These rules are crucial in building trust in digital transactions and protecting citizens' privacy rights, laying the groundwork for India's cybersecurity framework.

Cybersecurity Framework by CERT-In

The Cybersecurity Framework by the Indian Computer Emergency Response Team (CERT-In) is a critical initiative to enhance cybersecurity resilience across organizations in India. As part of the Ministry of Electronics and Information Technology, CERT-In provides proactive measures for managing cybersecurity threats and incidents. It mandates entities, including intermediaries, service providers, and government organizations, to report cybersecurity incidents within six hours of detection. Key responsibilities include issuing threat alerts,

promoting capacity building through training, and ensuring compliance with data retention protocols, such as maintaining system logs for at least 180 days.

The framework also emphasizes synchronizing system clocks with the National Time Protocol for accurate forensic analysis and reporting vulnerabilities to foster better preparedness. This comprehensive approach strengthens India's digital ecosystem by reducing risks from threats like data breaches, ransomware, and malware while promoting international collaboration to secure digital operations across sectors

In terms of the Consolidated FDI Policy, the work of granting government approval for foreign investment under the Consolidated FDI Policy and FEMA has now been entrusted to the concerned administrative ministries/departments.

The Foreign Exchange Management (Transfer or Issue of Security by a Person Resident outside India) Regulations, 2017 as amended in 2019, provide that the total holding by any individual NRI, on a repatriation basis, shall not exceed 5 percent of the total paid-up equity capital on a fully diluted basis or shall not exceed five percent of the paid-up value of each series of debentures or preference shares or share warrants issued by an Indian company and the total holdings of all NRIs and OCIs put together shall not exceed 10% of the total paid-up equity capital on a fully diluted basis or shall not exceed 10% of the paid-up value of each series of debentures or preference shares or share warrants; provided that the aggregate ceiling of 10 percent may be raised to 24 percent if a special resolution to that effect is passed by the general body of the Indian company.

The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Policy 2020 will be valid until the DIPP issues an updated circular. The Reserve Bank of India (“RBI”) also issues Master Directions Foreign Investment in India and updates the same from time to time. 1. The figures disclosed above are based on the restated unconsolidated summary statements of the Company.
 2. The above statement should be read with the notes to restated unconsolidated summary statements of assets and liabilities, profits and losses and cash flows appearing in

3. The Ratios have been computed as below

(a) Basic Earnings per share (Rs.)	$\frac{\text{Net profit after tax attributable to equity shareholders}}{\text{Weighted average number of equity shares outstanding during the year}}$
(b) Diluted Earnings per share (Rs.)	$\frac{\text{Net profit after tax}}{\text{Weighted average number of diluted equity shares outstanding during the year}}$
(c) Return on Net Worth (%)	$\frac{\text{Net Profit after tax}}{\text{Net worth at the end of the year}}$
(d) Net asset value per share (Rs.)	$\frac{\text{Net worth at the end of the year}}{\text{Total number of equity shares outstanding at the end of the year}}$

4. Weighted average number of equity shares is the number of equity shares outstanding at the beginning of the year adjusted by the number of equity shares issued during year multiplied by the time weighting factor. The time weighting factor is the number of days for which the specific shares are outstanding as a proportion of total number of days during the year.

5. Net worth for ratios mentioned in note 3(c) and 3(d) represents the aggregate of the paid up share capital and reserves and surplus (excluding revaluation reserve) as reduced by the aggregate of miscellaneous expenditure (to the extent not adjusted or written off) and the debit balance of the profit and loss account.

6. Earnings per share calculations are in accordance with Accounting Standard 20 on Earnings Per Share notified under section 133 of the Companies Act 2013, read together along with paragraph 7 of the Companies (Accounts) Rules, 2014. As per Accounting Standard 20, in case of bonus shares, shares split or consolidation of shares, the number of shares outstanding before the event is adjusted for the proportionate change in the number of equity shares outstanding as if the event has occurred at the beginning of the earliest period reported. Weighted average number of equity share outstanding during all the previous years have been considered accordingly. Bonus shares issued after the period (issued in March 2025) but before the approval of the financials were considered for calculation of Earnings per share for the periods restated

- Accounting policies have been consistently applied except where a newly issued accounting standard is initially adopted or a revision to an existing accounting standard requires a change in the accounting policy hitherto in use.

3. Summary of significant accounting policies

a. Use of Estimates

The preparation of Restated Unconsolidated Summary Statements in conformity with Indian GAAP requires the Management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the disclosure of contingent liabilities, at the end of the reporting year. Although these estimates are based on the Management's best knowledge of current events and actions, uncertainty about these assumptions and estimates could result in the outcome requiring a material adjustment to the carrying amounts of assets or liabilities in future years.

b. Tangible Fixed Assets

Tangible Fixed assets are stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. The cost comprises purchase price, borrowing costs if capitalisation criteria are met and directly attributable cost of bringing the asset to its working condition for the intended use. Any trade discounts and rebates are deducted in arriving at the purchase price.

Subsequent expenditure related to an item of fixed asset is added to its book value only if it increases the future benefits from the existing asset beyond its previously assessed standard of performance or extends its estimated useful life. All other expenses on existing fixed assets, including day-to-day repair and maintenance expenditure and cost of replacing parts, are charged to the statement of profit and loss for the period during which such expenses are incurred.

Gains or losses arising from derecognition of fixed assets are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the statement of profit and loss when the asset is derecognised.

c. Depreciation on tangible Fixed Assets

Useful lives/ depreciation rates

Depreciation on Property, Plant and Equipment and intangible assets is provided to the extent of depreciable amount on the written down value method. Depreciation on property, plant and equipment is provided based on useful life of the assets as prescribed in Schedule II to the Companies Act 2013.

Annexure V: Notes to Restated Unconsolidated Summary Statements

(All amounts in Lakhs Rupees except for share data or as otherwise stated)

d. Intangible Assets

Computer Software

i. Costs relating to software, which is acquired, are capitalised and amortised on a straight-line basis over their estimated useful lives of five years.

ii. Expenditure incurred on development of internally generated assets such as software from which future economic benefits will flow over a period of time is amortised over the estimated useful life or 5 years on a straight line basis, whichever is earlier.

Goodwill

Goodwill is amortised using the straight-line method over a period of five years.

e. Leases

Where the Company is a Lessee

Leases where the lessor effectively retains substantially all the risks and benefits of ownership of the leased item, are classified as operating leases. Operating lease payments are recognised as an expense in the statement of profit and loss.

f. Borrowing Costs

Borrowing costs include interest, amortisation of ancillary costs incurred in connection with the arrangement of borrowings and exchange differences arising from foreign currency borrowings to the extent they are regarded as an adjustment to the interest cost.

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the respective asset. All other borrowing costs are expensed in the year they occur.

g. Impairment

The Company assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) net selling price and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or group of assets. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining net selling price, recent market transactions are taken into account, if available. If no such transactions can be identified, an appropriate valuation model is used.

h. Investments

Investments, which are readily realisable and intended to be held for not more than one year from the date on which such investments are made, are classified as current investments. All other investments are classified as long-term investments.

On initial recognition, all investments are measured at cost. The cost comprises purchase price and directly attributable acquisition charges such as brokerage, fees and duties.

Long-term investments are carried at cost. Provision is made for diminution in value to recognise a decline other than temporary in the value of the investments. On disposal of an investment, the difference between its carrying amount and net disposal proceeds is charged or credited to the statement of profit and loss.

Annexure V: Notes to Restated Unconsolidated Summary Statements

(All amounts in Lakhs Rupees except for share data or as otherwise stated)

i. Inventories

(i) Raw materials and packing materials are valued at lower of cost and net realisable value. Materials and other items held for use in the production of inventories are not written down below cost if the finished products in which they will be incorporated are expected to be sold at or above cost. Cost of raw materials and packing materials is determined on a weighted average basis.

(ii) Work-in-progress and finished goods are valued at the lower of cost and net realisable value. Cost includes direct materials and labour and a proportion of manufacturing overheads. Cost of finished goods is determined on a weighted average basis.

(iii) Traded goods are valued at the lower of cost and net realisable value.

(iv) Stores and spares are valued at the lower of cost and net realisable value. Cost of stores and spares is determined on a weighted average basis.

(v) Net realisable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and estimated costs necessary to make the sale.

j. Revenue Recognition

Revenue is recognised to the extent that it is probable that economic benefits will flow to the Company and the revenue can be reliably measured. The following specific recognition criteria must also be met before revenue is recognised:

Sale of Products

Revenue is measured at the fair value of consideration received or receivable and represents amounts receivable for goods and services provided in the normal course of business, net of discounts and other sales-related taxes. Revenue is recognised once the performance obligation has been met. This is deemed to be when the goods and services have been collected by, or delivered to, the customer in accordance with the agreed delivery terms.

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured in accordance with AS-9, Revenue Recognition. Sales are recognized on accrual basis, and only after transfer of services to the customer.

Interest Income

Interest income is recognised on a time proportion basis taking into account the amount outstanding and the applicable interest rate. Interest income is included under the head "other income" in the statement of profit and loss.

Dividend Income

Dividend income is recognised when the Company's right to receive the dividend is established by the reporting date.

k. Foreign currency translation

i. Initial Recognition

Foreign currency transactions are recorded in the reporting currency, by applying to the foreign currency amount the prevailing exchange rate between the reporting currency and the foreign currency at the date of the transaction.

ii. Conversion

Foreign currency monetary items are reported using the closing rate. Non-monetary items which are carried in terms of historical cost denominated in a foreign currency are reported using the exchange rate at the date of the transaction. Non-monetary items which are carried at fair value or other similar valuation denominated in a foreign currency are reported using the exchange rates that existed when the values were determined.

iii. Exchange Differences

Exchange differences arising on the settlement of monetary items or on reporting Company's monetary items at rates different from those at which they were initially recorded during the year, or reported in previous Restated Unconsolidated Summary Statements, are recognised as income or as expenses in the year in which they arise.

iv. Forward Exchange Contracts not intended for trading or speculation purposes

The premium or discount arising at the inception of forward exchange contracts is amortised and recognised as expense or income over the life of the contract. Exchange differences on such contracts are recognised in the statement of profit and loss in the year in which the exchange rates change. Any profit or loss arising on cancellation or renewal of forward exchange contracts is recognised as income or as expense for the year.

l. Retirement and other employee benefits

Retirement benefits in the form of provident fund contribution and superannuation are defined contribution schemes. The contributions to the provident fund and superannuation fund are charged to the statement of profit and loss for the year when an employee renders the related service. The Company has no obligation, other than the contributions payable to the funds.

Gratuity liability is a defined benefit obligation and is provided for on the basis of an actuarial valuation on projected unit credit method made at the end of each financial year. Actuarial gains/losses are immediately taken to statement of profit and loss and are not deferred.

The Company treats accumulated leave, as a long-term employee benefit for measurement purposes. Such long-term compensated absences are provided for based on an actuarial valuation using the projected unit credit method at the year-end. Actuarial gains/losses are immediately taken to the statement of profit and loss and are not deferred. The Company presents the entire liability in respect of leave as a current liability in the balance sheet, since it does not have an unconditional right to defer its settlement for 12 months after the reporting date.

m. Taxes on Income

Tax expense comprises current and deferred tax. Current income tax is measured at the amount expected to be paid to the tax authorities in accordance with the Indian Income Tax Act, 1961. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date. Current income tax relating to items recognised directly in equity is recognised in equity and not in the statement of profit and loss.

Deferred income taxes reflect the impact of current year timing differences between taxable income and accounting income for the year and reversal of timing differences of earlier years. Deferred tax is measured based on the tax rates and the tax laws enacted or substantively enacted at the balance sheet date. Deferred income tax relating to items recognised directly in equity is recognised in equity and not in the statement of profit and loss. Deferred tax assets are recognised only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realised. In situations where the Company has unabsorbed depreciation or carry forward tax losses, the entire deferred tax assets are recognised only if there is virtual certainty supported by convincing evidence that such deferred tax assets can be realised against future taxable profits. At each balance sheet date, the Company re-assesses unrecognised deferred tax assets and accounts for unrecognised deferred tax assets to the extent that it has become reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available against which such deferred tax assets can be realised.

The carrying amount of deferred tax assets is reviewed at each balance sheet date. The Company writes down the carrying amount of a deferred tax asset to the extent that it is no longer reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available against which deferred tax assets can be realised. Any such write-down is reversed to the extent that it becomes reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available.

Minimum alternate tax (MAT) paid in a year is charged to the statement of profit and loss as current tax. The Company recognises MAT credit available as an asset only to the extent that there is convincing evidence that the Company will pay normal income tax during the specified period, i.e., the period for which MAT credit is allowed to be carried forward. In the year in which the Company recognises MAT credit as an asset in accordance with the Guidance Note on Accounting for Credit Available in respect of Minimum Alternative Tax under the Income-tax Act, 1961, the said asset is created by way of credit to the statement of profit and loss and shown as "MAT Credit Entitlement." The Company reviews the "MAT credit entitlement" asset at each reporting date and writes down the asset to the extent the Company does not have convincing evidence that it will pay normal tax during the specified period.

n. Employee stock options

Measurement and disclosure of the employee stock options are made in accordance with the Guidance Note on Accounting for Employee Share Based Payments Plans, issued by the Institute of Chartered Accountants of India. The Company measures compensation cost relating to employee stock options using the fair value method. Compensation expenses, if any, is amortised over the vesting period of the options on a straight line basis.

The analysis of geographical segments is based on the areas in which major operations of the Company are carried out and location of its customers.

Inter-segment transfers

The Company generally accounts for intersegment sales and transfers at cost plus appropriate margins. Inter segment profit/ charge is eliminated on combination of segmental results for the preparation of the accounts of the Company as a whole.

p. Earnings Per Share

Basic earnings per share are calculated by dividing the net profit or loss for the year attributable to equity shareholders (after deducting preference dividends and attributable taxes) by the weighted average number of equity shares outstanding during the year.

For the purpose of calculating diluted earnings per share, the net profit or loss for the year attributable to equity shareholders and the weighted average number of shares outstanding during the year are adjusted for the effects of all dilutive potential equity shares.

q. Provisions

A provision is recognised when the Company has a present obligation as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Provisions are not discounted to their present value and are determined based on the best estimate of the amount required to settle the obligation at the reporting date. These estimates are reviewed at each reporting date and adjusted to reflect the current best estimates.

Where the Company expects some or all of a provision to be reimbursed, for example under an insurance contract, the reimbursement is recognised as a separate asset but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the statement of profit and loss net of any reimbursement.

This is to further submit that during the FY 2023-24, our Cost of Material Consumed (COMC) was Rs. 3607.69 Lakhs which constituted 70.93% of revenue from operations as against COMC of Rs. 4660.62 in FY 22-23 which was 103.12%, which lead to increase in profits of the Issuer company. - Despite reductions in raw material costs, the company has maintained the same MRP of products.

This policy directly strengthened margins and profitability.

Change in order sale pattern and reduction in Operational and Selling Expenses during FY 23-24:

This is to submit that there has been Shift from Single-Subject Orders to Full-School Orders:

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and Foreign Exchange Management Act, 1999 (“FEMA”). While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India (“RBI”) and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“DIPP”).

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated Foreign Direct Investment Policy notified by the DPIIT File No. 5(2)/2020-FDI Policy dated October 15, 2020, with effect from October 15, 2020 (the “FDI Policy”), which consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT or the DPIIT that were in force and effect prior to October 15, 2020. The Government of India proposes to update the consolidated circular on FDI Policy once every year and therefore, the FDI Policy will be valid until the DPIIT issues an updated circular.

In terms of the FEMA NDI Rules, a person resident outside India may make investments into India, subject to certain terms and conditions, and provided that an entity of a country, which shares land border with India or the beneficial owner of an investment into India who is situated in or is a citizen of any such country, shall invest only with government approval.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company are under the automatic route under the foreign direct investment policy and transfer does not attract the provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/ RBI.

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country (“Restricted Investors”), will require prior approval of the Government, as prescribed in the Consolidated FDI Policy and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the FEMA Rules. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank or fund in India. Each Bidder should seek independent legal advice about its ability to participate in the Offer. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar to the Offer in writing about such approval along with a copy thereof within the Offer Period.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue and in accordance with the extant FDI guidelines on sectoral caps, pricing guidelines etc. as amended by Reserve bank of India, from time to time. Investors are advised to confirm their eligibility under the relevant laws before investing and / or subsequent purchase or sale transaction in the Equity Shares of our Company. Investors will not offer, sell, pledge or transfer the Equity Shares of our Company to any person who is not eligible under applicable laws, rules, regulations, guidelines. Our Company, the Underwriters and their respective directors, officers, agents, affiliates and representatives, as applicable, accept no responsibility or liability for advising any investor on whether such investor is eligible to acquire Equity Shares of our Company.

Investment conditions/restrictions for overseas entities

Any equity holding by a person resident outside India resulting from conversion of any debt instrument under any arrangement shall be reckoned as foreign investment under the composite cap.

Portfolio Investment upto aggregate foreign investment level of 49% or sectoral/statutory cap, whichever is lower, will not be subject to either Government approval or compliance of sectoral conditions, if such investment does not result in transfer of ownership and/or control of Indian entities from resident Indian citizens to non-resident entities. Other foreign investments will be subject to conditions of Government approval and compliance of sectoral conditions as per FDI Policy. The total foreign investment, direct and indirect, in the issuing entity will not exceed the sectoral/statutory cap.

However, this limit of 24 % may be increased up to sectoral cap/statutory ceiling, as applicable, by the Indian company concerned by passing a resolution by its Board of Directors followed by passing of a special resolution to that effect by its general body.

Where the proper instrument of transfer is not received by the Company within a period of two months from the date on which the instrument is dated, the Directors may at their sole discretion be entitled to seek such documentation including indemnities as it may deem fit, from both the transferor and transferee, or from the person who has lodged the same for transfer, and the Board may at its sole discretion be entitled to give effect to the transfer on receipt of such documentation and indemnities (save where an order of a competent court is produced, the Board shall then give effect to the transfer).

Nothing in Section 56 of the Act shall prejudice this power to refuse to register the transfer of or the transmission by operation of law of the right to, any shares or interest of a member in or debentures of the Company. The registration of a transfer shall be conclusive evidence of the approval by the Board of the transferee, but so far only as regards the share or shares in respect of which the transfer is so registered and not further or otherwise and not so as to debar the Board to refuse registration of any further shares applied for. If the Board refuses to register the transferor transmission of any shares notice of the refusal shall within

two months from the date on which the instrument of transfer on intimation of transmission was delivered

to the Company be sent to the Transferee and the Transferor or to the person giving intimation of the transmission, as the case may be.

69. The Company not liable for disregard of any notice prohibiting registration of a transfer

The Company shall incur no liability or responsibility whatever in consequence of its registering or giving effect to any transfer of shares made or purporting to be made, by an apparent legal owner thereof (as shown or appearing in the Register of Members), to the prejudice of any person or persons having or claiming any equitable right, title or interest to or in the same shares, notwithstanding that the Company may have had notice of such equitable right title or interest or prohibiting registration of such transfer and may have entered such notice or referred thereto in any book of the Company; and

the Company shall not be bound or required to regard or attend or give effect to any notice which may be given to it of any equitable right, title or interest or be under any liability whatsoever for refusing or neglecting so to do, though it may have been entered or referred to in some books of the Company; but the Company shall nevertheless be at liberty to regard and attend to any such notice and give effect thereto, if the Directors shall so think fit.

72. Increase of Capital by the Directors and how carried into effect

The Directors may from time to time without any sanction of the Company, whenever all the shares in the issued capital shall not have been subscribed and whether all the shares for the time being subscribed shall have been fully called up or not, issue further shares of such value as they may think fit out of the unsubscribed balance of the issued capital. Such further shares shall be issued upon such terms and conditions (and if preference shares upon such conditions as to redemption) and with such rights and privileges annexed thereto as the Board shall direct and in particular, such shares may be issued with a preferential or qualified right to dividend and in the distribution of assets of the Company and subject to the provisions of Section 47 of the said Act with or without any right of voting and the Board may dispose of such shares or any of them either at par or at a premium, to any members or any class thereof or in such other manner as the Board may think most beneficial to the Company.

 - e) To employees under a scheme of employees' stock option, subject to Special Resolution passed by the company and subject to such conditions as may be specified in the relevant Rules.
 - f) To any persons, by way of passing a Special Resolution to that effect, whether or not those persons include the persons referred to in sub-clause (a) or sub-clause (b), either for cash or for a consideration other than cash, if the price of such shares

is determined by the valuation report of a registered valuer subject to such conditions as may be specified in the relevant Rules.

- (ii) Whenever any shares are to be offered to the members the Directors may dispose of any such shares which, by reason of the proportion borne by them to the number of persons entitled to such offer or by reason of any other difficulty in apportioning the same cannot in the opinion of the Directors be conveniently offered to the members.

- (i) When any shares shall have been converted into stock, the several holders of such stock may thenceforth transfer their respective interests therein or any part of such interest, in the same manner and subject to the same regulations as and subject to which shares in the Company's capital may be transferred or as near thereto as circumstances will admit. But the Board may from time to time, if they think fit, fix the minimum amount of stock transferable and restrict or forbid the transfer of fractions of that minimum, but with full power, nevertheless, at the discretion to waive such rules in any particular case.
- (ii) Notice of such conversion of shares into stock or reconversion of stock into shares shall be filed with the Registrar of Companies as provided in the said Act.

77. Rights of stock-holders

The stock shall confer on the holders thereof respectively the same privileges and advantages, as regards participation in profits and voting at meetings of the Company and for other purposes, as would have been conferred by shares of equal amount in the capital of the Company of the same class as the shares from which such stock was converted but no such privileges or advantages, except the participation in profits of the Company or in the assets of the Company on a winding up, shall be conferred by any such aliquot part of, consolidated stock as would not, if existing in shares, have conferred such privileges or advantages. No such conversion shall affect or prejudice any preference or other special holders of the share and authenticated by such evidence (if any) as the provisions herein contained shall, so far as circumstances will admit, apply to stock as well as to shares and the words "share" and "shareholder" in these presents shall include "stock" and "stockholder".
